If you do not like limitations and expect healthcare tailored to your individual needs and expectations, the Premium Platinum Package is the perfect option for you. It will provide you with access to appointments and consultations with specialists, as well as a broad range of diagnostic tests and examinations, imaging scans and outpatient procedures. Moreover, your medical package will include home visits, physiotherapy and medical insurance when you travel abroad. Your comfort will be ensured by an Individual Patient’s Assistant who will provide answers to any questions you might have. The Premium Platinum Package is available exclusively for patients aged 0 to 70 who used to have a LUX MED medical package as part of their corporate schemes.

*The detailed list of services which are the part of the Package is defined in Detailed definitions of services. The presented table is only a dictionary of services available in the Package.*

### Detailed definitions of the services

#### Telephone Medical Assistance

The Telephone Medical Assistance is a Healthcare service provided by the healthcare organisation LUX MED in situations requiring urgent advice, through IT or telecommunication systems. The service includes the possibility of receiving Telephone Medical Assistance provided by medical specialists (physicians, nurses) in the scope of internal medicine/family medicine/paediatrics/nursing using the LUX MED’s nationwide infoline, 24 hours a day.

In medically justified cases, a medical specialist may refer the Patient to an outpatient medical consultation, decide to call an ambulance, or refer the Patient for urgent admission to the Hospital Emergency Department.
Online Consultations

The Online Consultation is a Healthcare service provided by the healthcare organisation LUX MED through IT or communication systems. LUX MED enables the Patients an interactive individual consultation with a medical specialist (doctor, midwife or nurse) via means of distance communication i.e. the Patient Portal. The Patients with full access to the Patient Portal may benefit from Online Consultations. Time accessibility of Online Consultations with a doctor, a midwife and a nurse is a consequence of the schedule of medical specialists and is visible under “Online Consultation” (“Konsultacje online”) tab. The Patient can choose a communication channel: video, audio or text.

Since medical specialists answering questions have access to the medical records of the Patient, in situations of medical necessity, they can order specific tests or refer the Patient to a different specialist. Online Consultation is exclusively available for the Patient who has logged in the Patient Portal and the content of Online Consultation is saved and constitutes a part of the medical documentation of the Patient. Online Consultations include listed below medical specialists consultations which do not require contact with a specialist in person.

The service covers Online Consultations in the following scope:

- internal medicine/family medicine (from the age of 18 years)
- pediatrics (under the age of 18 years)
- pediatric nursing
- obstetrics

Note:

Online Consultation with a specialist does not replace an outpatient consultation because it does not enable direct examination. In order to use the Online Consultation, the Patient after logging into the account on the Patient Portal in the “Online Consultations” tab sets himself in the queue waiting to use the service. The provision of services in the form of Online Consultations is only for the benefit of a Patient who has concluded the Agreement or who is indicated as a person entitled to Healthcare services under Online Consultations. The Patient cannot make Online Consultation service available to other individuals. The Patient bears full civil and criminal liability for the fact that the data provided are consistent with the facts.

Within the Online Consultations the Patient receives a Healthcare service, and as a part of that service may be issued: a referral for diagnostics, a referral to another specialist for the purpose of obtaining another Telemedicine Advice or a referral to another specialist in order to obtain a Healthcare service as part of an outpatient service, an e-Prescription for drugs for the continuation of chronic treatment, a de novo e-Prescription based on medical records and medical indications arising in the course of a Online Consultation, or a medical certificate for medical indications. In medically justified cases, while carrying out Online Consultation, a medical specialist may refuse to give advice at a distance and refer the Patient to an outpatient consultation with a doctor, a nurse or a midwife. No e-Sick Leaves and referrals for examinations using ionising radiation, biopsies, endoscopic examinations and exercise tests are issued during Online Consultations. The final decision to issue an e-Prescription is at the discretion of the physician who may refuse to issue an e-Prescription based on medical indications and the Patient’s welfare. No e-Prescriptions for vaccines, potent drugs, drugs that can cause addiction and postcoital contraception (emergency contraception) are issued during Online Consultation.

Healthcare specialists consultations

The service covers unlimited consultations in outpatient Medical Facilities indicated by LUX MED in the following situations: an illness and emergency medical assistance.

The service includes: medical history taking, physician’s advice and basic procedures necessary for making a diagnosis, taking an appropriate therapeutic decision and monitoring of treatment and refers to consultations within the following scope:

- Internal medicine
- Paediatrics
- Family doctor

Note: The service Healthcare specialists consultations – basic option does not include consultation of physicians on duty, physicians with the degree of "doktor habilitowany" (associate professor) or the scientific title of "profesor" (professor) as well as physicians holding the positions of "docent" (assistant professor), "profesor nadzwyczajny" (associate professor) and "profesor zwyczajny" (full professor).

Healthcare specialists consultations

The service covers an unlimited access to consultations with physicians in outpatient Medical Facilities indicated by LUX MED in such cases as onset of an illness, emergency medical assistance and general medical advice. Specialist consultations include an interview, advice by a specialist along with the basic activities necessary to make the diagnosis, taking the appropriate therapeutic decision and treatment monitoring.

For the:

Patients over 18 years of age – visits without a referral relate to consultations within the following scope:

- allergology
- anaesthesiology
- angiology
- audiology
- balneology and physical medicine
- general surgery
- vascular surgery
- surgical oncology
- infectious diseases
- dermatology
- diabetology
- endocrinology
- phlebology
- phoniatry
- gastroenterology

Note:

No e-Prescriptions for vaccines, potent drugs, drugs that can cause addiction and postcoital contraception (emergency contraception) and no referrals for examinations using ionising radiation, biopsies, endoscopic examinations and exercise tests are issued during Telephone Medical Assistance. The provision of services in the form of Telephone Medical Assistance is only for the benefit of a Patient who has concluded the Agreement or who is indicated as a person entitled to Healthcare services under Telephone Medical Assistance. The Patient cannot make Telephone Medical Assistance service available to other individuals. The Patient bears full civil and criminal liability for the fact that the data provided are consistent with the facts. A Telephone Medical Assistance does not replace an emergency service in a state of life or health threat. A Telephone Medical Assistance does not replace an outpatient consultation because it does not enable direct examination. The final decision to issue an e-Prescription during Online Consultation is at the discretion of the physician who may refuse to issue an e-Prescription based on medical indications and the Patient’s welfare.
Patients up to 18 years of age – visits without a referral relate to consultations within the following scope:

- dermatology
- gynaecology (from the age of 16)
- surgery
- gynaecology (under 16)
- neurology
- ophthalmology
- orthopaedics
- laryngology

Patients up to 18 years of age – visits require a referral from a LUX MED physician and relate to consultations within the following scope:

- allergology
- anaesthesiology
- infectious diseases
- diabetology
- endocrinology
- gastroenterology
- gynaecology (under 16)
- haematology
- immunology
- cardiology
- travel medicine
- nephrology
- neonatology
- neurology
- oncology
- neurosurgery

Note: The service Healthcare specialists consultations – option IV does not include consultation of physicians on duty, physicians with the degree of “doktor habilitowany” (associate professor) or the scientific title of “profesor” (professor) as well as physicians holding the positions of “docent” (assistant professor), “profesor nadzwyczajny” (associate professor) and “profesor zwyczajny” (full professor). Other consultations are also paid.

Dietician consultations - option II

The service entitles the Patient to attend dietary consultations, including interview, dietary recommendations (without creating an individual diet) in outpatient Medical Facilities indicated by LUX MED.

For the:

Patients over 18 years of age – visits without a referral

Patients up to 18 years of age – visits require a referral from a physician employed by an outpatient Medical Facility indicated by LUX MED.

On-duty physician consultations

The service includes exclusively basic emergency assistance in a sudden onset of an illness or in injuries requiring initial dressing which have occurred within 24 hours preceding the receipt of a consultation request by LUX MED. On-duty doctors are available within the working hours of outpatient Medical Facilities indicated by LUX MED separately, only on the day of reporting it. The service does not include healthcare services provided to save life and health in accordance with the National Medical Rescue Act (Journal of Laws 2006.191.1410, as amended).

The service includes: medical history taking, physician’s advice and basic procedures necessary for making an initial diagnosis, taking an appropriate therapeutic decision and refers to consultations within the following scope (provided that the consultations are available in the facility):

- Internal medicine
- Paediatrics
- Family doctor

Patients over 18 years of age, additionally (if the consultations are available in the clinic):

- general surgery
- orthopaedics

Specialists consultations: psychiatrist, psychologist, andrologist, sex therapist, speech therapist

The service entitles the Patient to attend a total of 3 consultations within a 12-month term of the agreement in outpatient Medical Facilities indicated by LUX MED, within the following scope:

For the:

Patients over 18 years of age – visits without a referral relate to consultations within the following scope:

- psychiatry
- psychology
- sex therapy
- andrology
- speech therapy
Patients up to 18 years of age – visits without a referral relate to consultations within the following scope:

- psychiatry
- psychology
- speech therapy

Note: This includes: medical history taking, specialist advice and basic procedures necessary for making a diagnosis, taking an appropriate therapeutic decision and monitoring of treatment. The service does not include professor consultations, neuro speech therapy or speech therapy in deaf and hearing-impaired patients or conducting therapy.

Professor consultations

The service entitles the Patient with a referral issued by a physician from an outpatient Medical Facility indicated by LUX MED to use the consultations of physicians with the degree of “doktor habilitowany” (associate professor) or the scientific title of “profesor” (professor) as well as physicians holding the positions of “docent” (assistant professor), “profesor nadzwyczajny” (associate professor) and “profesor zwyczajny” (full professor). The service (if available in outpatient Medical Facilities indicated by LUX MED) covers the same range of consultations which the Patient is entitled to on the grounds of the Agreement within the Specialists consultations in options: basic, basic – with co-payment, I, I - with co-payment, I plus, I plus- with co-payment, II, II - with co-payment, II plus, II Plus - with co-payment, III or IV.

Professor consultations: psychiatrist, psychologist

The service entitles the Patient to attend 3 consultations within a 12-month term of the agreement: Consultations of physicians or psychologists with the degree of “doktor habilitowany” (associate professor) or the scientific title of “profesor” (professor), as well as physicians or psychologists holding the positions of “docent” (assistant professor), “profesor nadzwyczajny” (associate professor) and “profesor zwyczajny” (full professor) who receive patients in outpatient Medical Facilities indicated by LUX MED, within the following scope:

- psychiatry
- psychology

The service is available with a referral issued by a physician from an outpatient Medical Facility indicated by LUX MED and includes: medical history taking, specialist advice and basic procedures necessary for making a diagnosis, taking an appropriate therapeutic decision and monitoring of treatment. The service does not include neuro speech therapy or speech therapy in deaf and hearing-impaired patients or conducting therapy.

Nursing procedures

Services including basic measurements, minor procedures, including diagnostic ones, performed by a nurse or midwife on their own or according to the physician’s order, in line with their competences, in outpatient Medical Facilities indicated by LUX MED. The scope of outpatient consultation procedures depends on the range of physician consultation which the Patient is entitled to within the scope of provided services, the age of the Patient and on the availability of a given procedure in an outpatient Medical Facility indicated by LUX MED.

Nursing procedures include:

**Outpatient nursing procedures:**

- Intravenous injection
- Subcutaneous/intramuscular injection
- Emergency drip administration
- Oral medicine administration in emergency cases
- Body temperature measurement (no referral needed)
- Placement/change/removal - small dressing
- Blood drawing
- Blood pressure measurement (no referral needed)
- Height and body weight measurement (no referral needed)
- Office-based midwife service – palpation of the breast

Note: Medical materials and products, such as: dressings, bandages, cannulae, syringes, swabs, adhesive strips, needles, serum - tetanus antitoxin, disinfectants, used for the above procedures are free of charge. Other products used in the above procedures need to be paid for by the Patient.

Outpatient procedures

The services including basic measurements and procedures (including the diagnostic ones) not requiring hospitalisation and operating room regimen. Performed in accordance with the competences by a physician or a nurse or an obstetrician during a procedure-specific consultation or beyond the medical consultation, in outpatient Medical Facilities indicated by LUX MED. The scope of outpatient consultation procedures depends on the range of physician consultation which the Patient is entitled to within the scope of provided services, the age of the Patient and on the availability of a given procedure in an outpatient Medical Facility indicated by LUX MED.

**Outpatient general medical procedures:**

- Blood pressure measurement
- Height and body weight measurement
- Non-surgical tick removal

**Outpatient surgical procedures:**

- Suturing of a wound up to 1.5 cm
- Surgical tick removal
- Non-surgical tick removal
- Placement/change/removal – small dressing (not requiring surgical debridement)
- Removal of another foreign body without incision
- Suture removal in a treatment room after procedures performed in outpatient Medical Facilities indicated by LUX MED
- Suture removal after procedures performed outside of outpatient Medical Facilities indicated by LUX MED – qualification based on the LUX MED doctor’s assessment (we do not remove stitches after childbirth)

**Outpatient laryngological procedures:**
- Eustachian tube examination, insufflation
- Catheterisation of the Eustachian tube
- Ear irrigation
- Removal of a foreign body from the nose/ear
- Simple laryngological dressing
- Coagulation of blood vessels of the nasal septum
- Electrocoagulation of blood vessels of the nasal septum
- Nasal tamponade removal
- Bilateral dressing of nasal hemorrhage

**Outpatient orthopaedic procedures:**
- Adjustment of small orthopaedic devices — small joints
- Reposition of a dislocation or fracture
- Preparation: traditional cast – tape
- Intra-articular injection and peri-articular injection
- Intra-articular puncture – taking sample material for examination
- Plaster cast application
- Lower limb plaster cast removal
- Upper limb plaster cast removal
- Intra-articular and peri-articular block;

**Outpatient dermatological procedures (do not include lesions removed due to aesthetic, plastic indications):**
- Standard* dermatoscopy
- Dermatological procedure – PUVA lamp
- Dermatological procedure – cutting and coagulation of skin fibromas

**Outpatient ophthalmologic procedures:**
- Removal of a foreign body from the eye
- Visual acuity examination
- Standard* autorefraction
- Medicine instillation into the conjunctival sac

**Outpatient laryngological procedures:**
- Unilateral dressing of nasal hemorrhage
- Suture removal in a treatment room after laryngological procedures performed in outpatient Medical Facilities indicated by LUX MED
- Suture removal after laryngological procedures performed outside of outpatient Medical Facilities indicated by LUX MED – qualification based on the LUX MED doctor’s assessment;
- Nasal administration of mucosa-shrinking medicine as needed
- Application/change/removal of a drain in the ear canal

**Outpatient orthopaedic procedures:**
- Placement/change/removal - small dressing
- Adjustment of small orthopaedic devices – big joints
- Dessault type immobilisation (small/large)
- Placement of a jacket type traditional plaster cast

**Outpatient dermatological procedures: (do not include lesions excised due to aesthetic, plastic indications):**
- Classical surgical excision of a skin lesion of up to 1.5 cm due to medical indications (does not include lesions excised due to aesthetic, plastic indications) with standard histopathological examination – specimen from the skin lesion removed
- Skin procedure – removal of a foreign body, with wound debridement (removal of a foreign body from the skin with wound debridement)
- Sampling of skin tissue for specialist examination
- Wound cleansing / excision
- Skin procedure – incision of haematoma / abscess, with drainage
- Nail surgery – cleaning / removal
- Ingrown nail procedure (onychoplasty) – bilateral
- Ingrown nail procedure (onychoplasty) – unilateral

**Outpatient ophthalmologic procedures:**
- Application of muscle relaxing drops
- Dilatation of pupil
- Standard* intraocular pressure measurement
- Standard* stereoscopic vision examination
- Lacrimal duct irrigation (refers to: Patients over 18 years of age)
- Placement of a jacket type traditional plaster cast
Dermatological procedure – curettage/destruction of skin lesion

Outpatient gynaecological procedures:
- Standard* sample collection for Pap smear
- Removal of an intrauterine contraceptive device
- Insertion of an intrauterine contraceptive device
- Cervical and vulvar procedures by cryocoagulation
- Cervical procedures by cryocoagulation – cervical erosion treatment

Outpatient allergological procedures:
- Desensitisation with allergist consultation

Anaesthesia
- Local (infiltration or permeation) anaesthesia
- Simple anaesthesia for colonoscopy
- Simple anaesthesia for gastroscopy
- Local (topical) anesthesia for endoscopy

Biopsy with standard histopathological examination – fine-needle biopsy material / core-needle biopsy material:
- Fine-needle biopsy – skin / subcutaneous tissue
- Fine-needle biopsy – breast
- Fine-needle biopsy - salivary gland
- Fine-needle biopsy – thyroid gland
- Fine-needle biopsy – lymph nodes
- Core biopsy of the prostate under ultrasonographic guidance

Other
- Foley catheter removal
- Performing an enema
- Foley catheter application
- Removal of a polyp up to 1 cm during colonoscopy
- Removal of a polyp up to 1 cm during gastroscopy

Note: Medical materials and products, such as: traditional and synthetic plaster cast, dressings, bandages, cannulae, syringes, swabs, adhesive strips, needles, serum - tetanus antitoxin, disinfectants, surgical sutures and threads, used for the above procedures are free of charge. Other products used in the above procedures need to be paid for by the Patient.

Influenza and tetanus vaccinations
As part of infectious disease prevention, the service includes vaccinations against seasonal flu and administer tetanus antitoxin (anti-tetanus antitoxin).
The service includes:
- Medical consultation before vaccination
- Vaccine (the medicinal product)
- Performance of a nursing service (injection).

Flue vaccinations are performed in outpatient Medical Facilities indicated by LUX MED.

Additional recommended preventive vaccinations
The service is available within the additional prophylaxis of infectious diseases in outpatient Medical Facilities indicated by LUX MED, following referral issued by a physician of the abovementioned Clinic. The service covers the following vaccinations (this also refers to combination vaccines) against:
- Tick-borne encephalitis
- Hepatitis A and B
- Hepatitis A
- Rubella, mumps, measles

The service includes:
- Medical consultation before vaccination
- Vaccine (the medicinal product)
- Performance of a nursing service (injection).
Laboratory test panel (no referral needed)

The service is only available for the Patient over 18 years of age and is provided only in outpatient Medical Facilities indicated by LUX MED. The service includes a one-time performance of a panel of laboratory tests, composed of the following items, without a referral from a physician (within 12 months of the term of the agreement):

- Urine – general analysis
- Blood count + platelet count + automated smear
- Total cholesterol
- Fasting glucose
- Standard* Pap smear (available for Patients over 16 years of age)

Laboratory and imaging diagnostics

This includes the following laboratory, imaging and functional diagnostic tests performed in outpatient Medical Facilities indicated by LUX MED. The number of performed tests is unlimited. All diagnostic tests and examinations available within the service are performed following referrals issued by physicians from outpatient Medical Facilities indicated by LUX MED, only based on medical indications as part of a diagnostic and therapeutic process conducted in these Medical Facilities.

Laboratory diagnostics:

Haematology and coagulology tests with taking test samples (blood):

- Absolute eosinophil count
- Blood count + platelet count + automated smear
- ESR
- Manual blood smear
- Platelets
- INR / Prothrombin time
- Thrombin time – TT
- D – dimers
- APTT
- Fibrinogen
- S protein free
- Antithrombin III
- C protein activity
- Factor V Leiden – PCR method

Biochemical and hormonal tests, tumour marker tests with taking test samples (blood):

- CRP quantitative
- GPT/ALT transaminase
- GOT/AST transaminase
- Amylase
- Albumins
- Total protein
- PAPP – a protein
- Total bilirubin
- Direct bilirubin
- Chlorides (Cl)
- Cholesterol
- HDL cholesterol
- LDL cholesterol
- Directly measured LDL cholesterol
- CK (creatine kinase)
- LDH – Lactate dehydrogenase
- Alkaline phosphatase
- Acid phosphatase
- Phosphorus (P)
- GGTP
- Glucose tolerance test (4 points, 75 g, 0, 1, 2, 3 h)
- Fasting glucose
- Glucose 120'/120' after a meal
- Glucose 60'/60' after a meal
- Glucose 75 g, 4-hour glucose challenge test
- Glucose 75 g, 5-hour glucose challenge test
- Creatinine
- Uric acid
- Lipid profile (CHOL, HDL, LDL, TG)
- Magnesium (Mg)
- Urea/blood urea nitrogen, BUN
- Potassium (K)
- Protein profile
- Sodium (Na)
- Triglycerides
- Calcium (Ca)
- Iron (Fe)
- Immunoglobulin IgE (total IgE)
- Immunoglobulin IgA
- Immunoglobulin IgG
- Immunoglobulin IgM
- Folic acid
- Vitamin B12
- TIBC – total iron binding capacity (alternative to Fe saturation)
- Iron / Fe 120 mins after administration (absorption curve)
- Iron / Fe 180 mins after administration (absorption curve)
- Iron / Fe 240 mins after administration (absorption curve)
- Iron / Fe 300 mins after administration (absorption curve)
- Iron / Fe 60 mins after administration (absorption curve)
- Ferritin
- Caeruloplasmin
- Transferrin
- Thyroglobulin
- Apolipoprotein A1
- Lipase
- 17 – OH Progesterone
- Aldosterone
- Copper
- Cortisol in the afternoon
- Cortisol in the morning
- Prolactin 120' after administration MCP 1 tablet
- Prolactin 30' after administration of MCP 1 tablet
- Prolactin 60' after administration of MCP 1 tablet
- Prolactin
- TSH / hTSH
- Estradiol
- FSH
- Free T3
- Free T4
- Total Beta-hCG
- LH
- Progesterone
- Testosterone
- Fee testosterone
- AFP – alpha-fetoprotein
- Free PSA
- Total PSA
- CEA – carcinoembryonic antigen
- CA 125
Serology tests and infection diagnostics with taking test samples (blood):

- Basic syphilis serology (VDRL orUSR or anti-TP), formerly WR
- ASO quantitative
- ASO qualitative
- RF – Rheumatoid Factor – quantitative
- Waaler-Rose test
- BTA test
- Blood group (ABO), Rh factor and antibody screening
- Immune antibody screening / alloantibodies (replaces anti-Rh /- / antibodies)
- HBs Ag/antigen
- A-microsomal/anti-TPO antibodies
- Antithyroglobulin / anti-TG antibodies
- CMV antibodies IgG
- CMV antibodies IgM
- HBs Ab/antibodies;
- HCV Ab/antibodies
- Helicobacter pylori IgG, quantitative;
- HIV-1/HIV-2
- EBV/mononucleosis – latex
- EBV / mononucleosis IgG
- EBV / mononucleosis IgM
- Rubella IgG
- Rubella IgM
- Toxoplasma IgG
- Toxoplasma IgM
- Chlamydia trachomatis IgA antibodies
- Chlamydia trachomatis IgG antibodies
- Chlamydia trachomatis IgM antibodies
- HBc Ab IgM
- C1 – inhibitor
- C1 – inhibitor (activity)
- Complement component 3 (C3)
- Complement component 4 (C4)
- Anti-HAV – IgM
- Anti-HAV – total
- Lupus anticoagulant
- Echinococcosis (Echinococcus granulosus) IgG
- Borella burgdorferii, method: Qualitative PCR
- EBV/mononucleosis – latex
- EBV / mononucleosis IgG
- EBV / mononucleosis IgM
- Rubella IgG
- Rubella IgM
- Toxoplasma IgG
- Toxoplasma IgM
- Chlamydia trachomatis IgA antibodies
- Chlamydia trachomatis IgG antibodies
- Chlamydia trachomatis IgM antibodies
- HBc Ab IgM
- C1 – inhibitor
- C1 – inhibitor (activity)
- Complement component 3 (C3)
- Complement component 4 (C4)
- Anti-HAV – IgM
- Anti-HAV – total
- Lupus anticoagulant
- Echinococcosis (Echinococcus granulosus) IgG
- Borella burgdorferii, method: Qualitative PCR
- EBV/mononucleosis – latex
- EBV / mononucleosis IgG
- EBV / mononucleosis IgM
- Rubella IgG
- Rubella IgM
- Toxoplasma IgG
- Toxoplasma IgM
- Chlamydia trachomatis IgA antibodies
- Chlamydia trachomatis IgG antibodies
- Chlamydia trachomatis IgM antibodies
- HBc Ab IgM
- C1 – inhibitor
- C1 – inhibitor (activity)
- Complement component 3 (C3)
- Complement component 4 (C4)
- Anti-HAV – IgM
- Anti-HAV – total
- Lupus anticoagulant
- Echinococcosis (Echinococcus granulosus) IgG
- Borella burgdorferii, method: Qualitative PCR
- EBV/mononucleosis – latex
- EBV / mononucleosis IgG
- EBV / mononucleosis IgM
- Rubella IgG
- Rubella IgM
- Toxoplasma IgG
- Toxoplasma IgM
- Chlamydia trachomatis IgA antibodies
- Chlamydia trachomatis IgG antibodies
- Chlamydia trachomatis IgM antibodies
- HBc Ab IgM
- C1 – inhibitor
- C1 – inhibitor (activity)
- Complement component 3 (C3)
- Complement component 4 (C4)
- Anti-HAV – IgM
- Anti-HAV – total
- Lupus anticoagulant
- Echinococcosis (Echinococcus granulosus) IgG
- Borella burgdorferii, method: Qualitative PCR
- EBV/mononucleosis – latex
- EBV / mononucleosis IgG
- EBV / mononucleosis IgM
- Rubella IgG
- Rubella IgM
- Toxoplasma IgG
- Toxoplasma IgM
- Chlamydia trachomatis IgA antibodies
- Chlamydia trachomatis IgG antibodies
- Chlamydia trachomatis IgM antibodies
- HBc Ab IgM
- C1 – inhibitor
- C1 – inhibitor (activity)
- Complement component 3 (C3)
- Complement component 4 (C4)
- Anti-HAV – IgM
- Anti-HAV – total
- Lupus anticoagulant
- Echinococcosis (Echinococcus granulosus) IgG
- Borella burgdorferii, method: Qualitative PCR
- EBV/mononucleosis – latex
- EBV / mononucleosis IgG
- EBV / mononucleosis IgM
- Rubella IgG
- Rubella IgM
- Toxoplasma IgG
- Toxoplasma IgM
- Chlamydia trachomatis IgA antibodies
- Chlamydia trachomatis IgG antibodies
- Chlamydia trachomatis IgM antibodies
- HBc Ab IgM
- C1 – inhibitor
- C1 – inhibitor (activity)
- Complement component 3 (C3)
- Complement component 4 (C4)
- Anti-HAV – IgM
- Anti-HAV – total
- Lupus anticoagulant
- Echinococcosis (Echinococcus granulosus) IgG
- Borella burgdorferii, method: Qualitative PCR
Antibodies to pancreatic islets, antibodies, method: ELISA

Transglutaminase (anti-tissue)

Anti-endomysial and gliadin (total), method: IIF

IgA antibodies to endomysium

IgM antibodies (total)

Antibodies to Castle’s intrinsic factor and anti-parietal cell antibodies (APCA), method: IIF

Antibodies to double-stranded / native DNA – dsDNA (nDNA)

Endomysium IgA antibodies – EmA IgA

Endomysium IgG antibodies – EmA IgG

Endomysium IgG, IgA antibodies – EmA IgG

Anti-gliadin IgG and IgA (AGA)

Anti-gliadin antibodies – AGA

Anti-nuclear and anti-cyttoplasmatic antibodies (ANA1, screening, method: IIF

Antibodies to myocardial cells (HMA)

Anti-parietal cell antibodies (APCA), method: IIF

Anti-smooth muscle antibodies (ASMA)

Anti-mitochondrial antibodies (AMA)

Anti-mitochondrial antibodies (AMA) type M2

Yersinia enterocolitica antibodies – IgG

Yersinia enterocolitica antibodies – IgG, IgM, IgA (total)

Yersinia enterocolitica antibodies – IgM

Liver panel antibodies – (anti-LKM, anti-LSP, anti-SLA), method: IIF

Full liver panel antibodies (ANA2, AMA, ASMA, anti-LKM, anti-LSP, anti-SLA), method: IIF, DID

Antibodies to acetylcholine receptors (AChR-Ab)

Antibodies to TSH receptors (TRAb)

Anti-nuclear (including histone, Ku, rib-P-Protein) antibodies (ANA3), method: Western blot

Anti-nuclear and anti-cyttoplasmatic antibodies (ANA2), method: IIF, DID

Pertussis – IgA
Bacteriological tests with taking smear (the service does not include tests performed using molecular biology techniques):

- Anti-endomysial and anti-reticulin IgG antibodies
- EBV, method: Quantitative PCR
- EBV, method: Qualitative PCR
- Mycoplasma pneumoniae, method: Qualitative PCR
- Ureaplasma urealyticum, method: Qualitative PCR
- Tick-borne encephalitis IgM antibodies
- Trichinosis, IgG
- Toxoplasma gondii, method: Qualitative PCR
- Glutamic acid decarboxylase (anti-GAD) antibodies
- Tyrosine phosphatase (IA2) antibodies

Urine tests with taking test samples (urine):

- Urine – general analysis
- Vanillylmandelic acid (VMA) in urine
- Urine protein
- Total protein / 24-hour urine collection
- Phosphorus in urine
- Phosphorus in urine / 24-hour urine collection
- Creatinine in urine
- Creatinine – urine / 24-hour urine collection
- Uric acid in urine / 24-hour urine collection
- Uric acid in urine
- Magnesium / Mg in urine
- Magnesium / Mg / 24-hour urine collection
- Urea/blood urea nitrogen, BUN in urine / 24-hour urine collection
- Urea/blood urea nitrogen, BUN in urine
- Sodium/Na in urine
- 17-ketosteroids in 24-hour urine collection
- Sodium/Na in urine / 24-hour urine collection
- Calcium in urine
- Calcium/Ca in urine / 24-hour urine collection
- Delta -aminolevulinic acid (ALA)
- Delta -aminolevulinic acid (ALA) in 24-hour urine collection
- Potassium (K) — urine
- Potassium (K) — urine / 24-hour urine collection
- Catecholamines (noradrenaline, adrenaline) in 24-hour urine collection
- Cortisol in 24-hour urine collection
- Metoxycatecholamines in 24-hour urine collection
- Lead/Pb in urine
- Albumin in 24-hour urine collection
- Albumin / Albumins
- Aldosterone in 24-hour urine collection
- Amylase in urine
- Bence–Jones protein in urine

Chemical composition of renal calculi

D-Pyrillinks (bone resorption marker)

Bacteriological tests with taking smear (the service does not include tests performed using molecular biology techniques):

- Urine culture
- General faeces culture
- Pharyngeal / tonsil swab – aerobic culture
- Oral cavity swab — aerobic culture
- Ear swab – anaerobic culture
- Ear swab – aerobic culture
- Eye swab – aerobic culture
- Nasal swab
- Nasal swab – aerobic culture
- Nasopharyngeal swab – anaerobic culture
- Nasopharyngeal swab – aerobic culture
- Anal and vaginal swab culture for Streptococcus GBS
- Vaginal swab – anaerobic culture
- Vaginal swab – aerobic culture
- Culture for GC (GNC) Vaginal swab
- Wound swab
- Wound swab – anaerobic culture
- Stool culture for SS
- Vaginal microbiological test (vaginal biocenosis)
- Semen culture — aerobic
- Sputum culture
- Endocervical swab
- Endocervical smear – anaerobic culture
- Culture for GC (GNC) Endocervical swab
- Stool culture for Pathogenic E. Coli in children up to 2 years
- Stool culture for Yersinia enterocolitica
- Urethral swab
- Urethral swab – anaerobic culture
- Culture of human milk from left breast – aerobic
- Culture of human milk from right breast – aerobic
- Abscess content culture
- Abscess content – anaerobic culture
- Urethral swab for GC (GNC) culture
- Left ear seton – aerobic culture
- Right ear seton – aerobic culture
- Breast discharge – aerobic culture
- Foreskin swab – aerobic culture
- Furuncle swab
- Gingival swab – aerobic culture
- Tongue swab – aerobic culture
- Laryngeal swab – aerobic culture
- Laryngeal swab for Pneumocystis carini
- Anal swab – aerobic culture
- Anal swab culture for SS
- Ulceration swab – aerobic culture
- Umbilical swab – aerobic culture
- Penile swab – aerobic culture
- Vulvar swab – aerobic culture
- Skin lesion swab – aerobic culture

Sodium/Na in urine / 24-hour urine collection
Calcium in urine
Calcium/Ca in urine / 24-hour urine collection
Delta -aminolevulinic acid (ALA)
Delta -aminolevulinic acid (ALA) in 24-hour urine collection
Potassium (K) — urine
Potassium (K) — urine / 24-hour urine collection
Catecholamines (noradrenaline, adrenaline) in 24-hour urine collection
1. Chlamydia pneumoniae antigen, method: IIF swab
2. Chlamydia pneumoniae antigen, method: IIF swab – other material
3. Chlamydia pneumoniae antigen, method: IIF – Throat swab
4. Chlamydia pneumoniae PCR swab
5. Chlamydia trachomatis antigen, method: IIF swab – other material
6. Chlamydia trachomatis antigen, method: IIF – Endocervical swab
7. Chlamydia trachomatis, method: PCR – qualitative method (vaginal swab, urethral swab or urine)
8. Eosinophils in nasal swab
9. Mycoplasma hominis and Ureaplasma urealiticum urethral swab
10. Faecal analysis for rota- and adenovirus
11. Faecal ELISA analysis for lamblia

Faecal tests with taking test samples:
- Stool analysis
- Faeces analysis for parasites, 1 assay
- Faecal occult blood (FOB)

Cytology tests with taking test samples:
- Standard* Pap smear
- Standard* nasal mucosa cytological test

Mycolological tests with taking smear (the service does not include tests performed using molecular biology techniques):
- Mycolological examination – toenail fungal culture
- Mycolological examination – fingernail fungal culture
- Mycolological examination – hair fungal culture
- Mycolological examination – skin fungal culture
- Mycolological examination – skin scraping fungal culture
- Stool culture for yeast-like fungi
- Urine culture for yeast-like fungi
- Sputum culture for yeast-like fungi
- Abscess content culture for yeast-like fungi
- Secretion culture for yeast-like fungi
- Swab culture for yeast-like fungi
- Urethral swab culture for yeast-like fungi
- Pharyngeal / tonsil swab culture for yeast-like fungi
- Endocervical smear, culture for yeast-like fungi
- Nasal swab culture for yeast-like fungi
- Nasopharyngeal swab – culture for yeast-like fungi
- Eye swab culture for yeast-like fungi;
- Vaginal swab culture for yeast-like fungi
- Wound smear culture for yeast-like fungi
- Ear swab culture for yeast-like fungi
- Oral swab – culture for yeast-like fungi
- Mycolological examination – hand epidermis fungal culture – scrapings
- Mycolological examination – foot epidermis fungal culture – scrapings

Toxicological tests with taking test samples (blood):
- Digoxin
- Lead
- Carbamazepine
- Valproic acid
- Bile acids
- Lithium
- Toxicological test – methemoglobin quantitative
- Phenytin, quantitative
- Ciclosporin A, quantitative
- Phenytoin, quantitative
- Ciclosporin A, quantitative

Quick strip tests with taking test samples (blood):
- CRP – strip test
- Cholesterol strip test
- Glucose meter test
- Troponin – strip test
- Pharyngeal swab for Streptococcus a. quick test

Diagnostic imaging:

ECG examinations:
- Resting ECG
- Stress test
- Stress test Exercise ECG using an cycloergometer
- Mounting of a standard* Holter ECG monitor (for 24h) in an office
Mounting Holter ECG monitor with 12 leads (for 24h)

Mounting Holter RR (for 24h) device in an office

X-ray (medium conforming with the standard applicable in a given clinic):

- Cranial X-ray orbits
- X-ray of orbits + lateral (2 views)
- Cranial X-ray PA + lateral
- Cranial X-ray PA + lateral + base
- Cranial X-ray, base
- Cranial X-ray, semi-axial by Orley
- Cranial X-ray, sella turcica
- Cranial X-ray, tangential
- Cranial X-ray, cranial nerve canals
- Splanchnocranium X-ray
- Abdominal X-ray, other
- Abdominal X-ray, supine
- Abdominal X-ray, erect
- Chest X-ray
- Chest X-ray – X-ray tomography
- Chest X-ray + lateral
- Chest X-ray, lateral with barite
- Chest X-ray, other
- Chest X-ray PA + lateral with barium
- X-ray of chest, thyroid, trachea
- Sacrococcygeal X-ray
- Lateral nasal X-ray
- Lower leg X-ray, AP + lateral
- Lower leg X-ray, AP + bilateral lateral
- Upper leg and lower leg X-ray
- Femoral bone X-ray, AP + left lateral
- Femoral bone X-ray, AP + right, lateral
- Shoulder X-ray, axial
- Shoulder X-ray, bilateral axial
- Shoulder X-ray, AP + lateral
- Shoulder X-ray: AP + bilateral – comparative image
- Shoulder X-ray, AP
- Shoulder X-ray, AP, both – comparative image
- Forearm X-ray, AP + lateral
- Bilateral forearm X-ray, AP + lateral
- Elbow/forearm X-ray, AP + lateral
- Elbow/forearm X-ray, AP + lateral, bilateral
- X-ray of temporal bones, transorbital
- X-ray of temporal bones by Schuller/Stevers
- Temporal bone pyramid X-ray, transorbital
- Hand X-ray, lateral
- Hand X-ray, PA
- Hand X-ray PA, bilateral
- Finger(s) X-ray, PA + lateral/oblique
- Finger(s) X-ray, PA + lateral/oblique bilateral
- Scaphoid X-ray
- Foot X-ray, AP + lateral/oblique
- Foot X-ray, AP + lateral/oblique, erect
- Foot X-ray, AP + lateral/oblique bilateral
- Foot X-ray, AP + lateral/oblique bilateral, erect
- Foot X-ray, AP (comparative)
- Metatarsal X-ray
- Toe(s) X-ray, AP + lateral/oblique
- Heel X-ray + axial
- Heel X-ray, lateral
- Lumbar X-ray: AP + lateral
- X-ray of lumbar spine, AP + lateral + oblique
- X-ray of lumbar spine, lateral
- X-ray of lumbosacral spine, oblique
- X-ray of lumbosacral spine AP + lateral
- Lumbar functional X-ray
- Thoracic X-ray
- Thoracic X-ray AP + lateral
- Thoracic X-ray, AP + lateral + oblique
- Thoracic X-ray, lateral
- Thoracic X-ray, oblique views
- Cervical X-ray
- Cervical X-ray, AP + lateral
- Cervical X-ray, lateral
- Cervical X-ray, lateral + oblique (3 views)
- Cervical X-ray, oblique views
- Cervical functional X-ray
- Scapular X-ray
- Pelvic and hip joint X-ray
- X-ray of sternum, AP
- X-ray sternum / chest lateral
- Mandibular X-ray
- Paranasal sinus X-ray
- Ribs X-ray (unilateral), 2 oblique views
- Wrist X-ray, lateral
- X-ray of both wrists, lateral
- Wrist X-ray, PA + lateral
- Wrist X-ray, PA + bilateral lateral
- Hand X-ray, PA + oblique
- Hand X-ray, PA + oblique, bilateral
- Wrist/hand X-ray, PA + lateral/oblique left
- Wrist/hand X-ray, PA + lateral/oblique right
- Wrist/hand X-ray, PA + lateral/oblique bilateral
- X-ray of both patellae axial
- Bilateral patellar X-ray, axial in 2 positions
- Bilateral patellar X-ray, axial in 3 positions
- X-ray of sacroiliac joints – PA
- X-ray of sacroiliac joints – oblique
- Hip joint X-ray, AP
- Bilateral hip joint X-ray, AP
- Hip joint X-ray, axial
- Knee joint X-ray, AP + lateral
- Knee joint X-ray, AP + bilateral lateral
- Knee joint X-ray, AP + bilateral lateral, erect
- Knee joint X-ray, lateral
- Elbow joint X-ray
- Ankle joint X-ray, AP + lateral
- Ankle joint X-ray, AP + lateral bilateral
- Temporomandibular joint functional X-ray
- Urography (with standard contrast agents)
- X-ray of nasopharynx
- Shoulder X-ray (transthoracic)
- Shoulder X-ray, AP + axial
- Clavicular X-ray
- Large intestine X-ray – rectal enema (with standard contrast agents)
- Chest X-ray – X-ray tomography
- Larynx X-ray – tomography
- X-ray, small intestine passage (with standard contrast agents)
- Esophagus, stomach and duodenum X-ray (with standard contrast agents)
- X-ray teleradiogram – digital cephalometry
### Ultrasound examinations:
- Abdominal ultrasound
- Urinary tract ultrasound
- Breast ultrasound
- Thyroid ultrasound
- Transabdominal prostate ultrasound
- Transvaginal gynaecological ultrasound
- Transabdominal gynaecological ultrasound
- Testicular ultrasound
- Salivary gland ultrasound
- Transrectal prostate ultrasound
- Salivary gland ultrasound
- Testicular ultrasound
- Ultrasound/Doppler ultrasound of upper limb arteries
- Ultrasound/Doppler ultrasound of upper limb veins
- Ultrasound/Doppler ultrasound of upper limb veins
- Ultrasound/Doppler ultrasound of the abdominal aorta and pelvic arteries
- Ultrasound/Doppler ultrasound of hepatic vessels (assessment of hepatic portal circulation)
- Ultrasound/Doppler ultrasound of renal arteries
- Ultrasound/Doppler ultrasound of intracranial arteries
- Hip joints ultrasound – for children
- Hip joints ultrasound + orthopaedic consultation (up to 1 year of age)
- Hip joint ultrasound
- Knee joint ultrasound
- Elbow joint ultrasound
- Ankle joint ultrasound
- Shoulder ultrasound
- Subcutaneous tissue ultrasound (lipomas, fibromas, etc.)
- Post-traumatic muscle haematoma ultrasound
- Lymph node ultrasound
- Laryngeal ultrasound
- Wrist ultrasound
- Ultrasound of ligaments, muscles, small joints
- Ultrasound of metatarsal
- Ultrasound of the plantar aponeurosis
- Finger and metacarpophalangeal joint ultrasound
- Achilles tendon ultrasound
- Urinary tract ultrasound + TRUS
- Trans-fontanelle ultrasound
- Echocardiography – cardiac ultrasound
- Ultrasound of eyeballs and orbits
- Obstetric ultrasound – extended examination (4 D)
- Ultrasound of pleura
- Echocardiography – cardiac ultrasound (foetal)

### Endoscopic examinations with endoscopic biopsy specimen sampling:
- Anoscopy
- Gastroscopy (with urease test)
- Rectoscopy
- Sigmoidoscopy
- Colonoscopy
- Histopathological examination — endoscopy biopsy material
- Laryngological endoscopy

### Magnetic resonance imaging with standard contrast agents:
- MR – magnetic resonance of head
- MR – magnetic resonance, angiography head
- MR – magnetic resonance head + angiography
- MR – magnetic resonance, head and pituitary gland
- MR – magnetic resonance, splanchnocranium
- MR – magnetic resonance of abdomen
- MR – magnetic resonance of small pelvis
- MR – magnetic resonance of bone pelvis
- MR – magnetic resonance of abdomen and small pelvis;
- MR – magnetic resonance of thorax
- MR – magnetic resonance of lumbar spine
- MR – magnetic resonance of thoracic spine
- MR – magnetic resonance of cervical spine
- MR – magnetic resonance of orbits
- MR – magnetic resonance of sinuses
- MR – magnetic resonance of pituitary gland
- MR – magnetic resonance of shoulder joint
- MR – magnetic resonance of elbow joint
- MR – magnetic resonance of knee joint
- MR – magnetic resonance of wrist
- MR – magnetic resonance of ankle joint
- MR – magnetic resonance of hip joint
- MR – magnetic resonance of sacroiliac joints
- MR – magnetic resonance of foot
- MR – magnetic resonance of lower leg
- MR – magnetic resonance of upper leg
- MR – magnetic resonance of forearm
- MR – magnetic resonance of arm
- MR – magnetic resonance of hand
- MR – magnetic resonance of neck
- MR – magnetic resonance – arteriography of lower limb arteries
- MR – magnetic resonance – heart examination with quantitative assessment of systolic function, viability, perfusion at rest and viability assessment
- MR – magnetic resonance – Cholangiography MR
- MR – magnetic resonance – Mammography MR
- MR – magnetic resonance – heart morphological examination with quantitative assessment of systolic function and viability assessment
- MR – magnetic resonance – heart examination with quantitative assessment of systolic function
- MR – magnetic resonance – heart examination with quantitative assessment of blood flow
Computer tomography with standard contrast agents:

- CT – computed tomography of head
- CT – computed tomography of facial skeleton
- CT – computed tomography of pituitary gland
- CT – computed tomography of sinuses
- CT – computed tomography of orbits
- CT – computed tomography of temporal bones
- CT – computed tomography of neck
- CT – computed tomography of larynx
- CT – computed tomography of thorax
- CT – low-dose computed tomography of thorax
- CT – computed tomography of thorax (HRCT)
- CT – computed tomography of abdomen
- CT – computed tomography of small pelvis
- CT – computed tomography of pelvic bones
- CT – computed tomography of abdomen and small pelvis
- CT – computed tomography of thorax and abdomen
- CT – computed tomography of thorax, abdomen, small pelvis
- CT – computed tomography of neck, thorax, abdomen, small pelvis

EEG examinations:

- Standard* EEG
- Standard* EEG (children)

EMG examinations:

- EMG – electromyography – carpal tunnel syndrome
- EMG – electromyography – quantitative assessment of the muscle
- EMG – electromyography – motor neuron disease / amyotrophic lateral sclerosis (MND / SLA)
- EMG – electromyography – facial nerve
- EMG – electromyography – non-traumatic nerve injury
- EMG – electromyography – assessment of muscle function at rest
• EMG – electromyography – polynuepathy/myopathy
• EMG – electromyography – traumatic nerve injury

Electroneurographic examinations:
• Electroneurography (ENG) – sensory nerve
• Electroneurography (ENG) – motor nerve (long)
• Electroneurography (ENG) – motor nerve (short sections)

Scintigraphy:
• Scintigraphy – bones
• Scintigraphy – kidneys (Renoscintigraphy)
• Scintigraphy – heart – exercise
• Scintigraphy – heart – at rest
• Scintigraphy – thyroid gland

Other diagnostic tests and examinations:
• Spirometry without medication
• Spirometry – diastolic test
• Standard audiometry
• Standard audiometry – supraliminal audiometry
• Standard audiometry – verbal audiometry
• Tymanometry
• Lumbar spine densitometry (trabecular bone assessment) – screening
• Densitometry femoral collum (cortical bone assessment) – screening
• Uroflowmetric examination
• Colposcopy
• Mammography

• Mammography – targeted image
• Computerised visual field test
• Dark adaptation test
• Pachymetry
• GDX examination
• OCT examination – both eyes
• OCT examination – one eye
• Vibratory perception
• Labyrinth test
• Cold provocation test
• Cold provocation test with skin thermometry and compression test
• Fluorescein angiography
• Anomaloscope test
• ABR – differential diagnostics

• ABR – latencies
• Impedance audiometry – with tympanometry and stapedial muscle reflex evaluation (IA)
• Audiometric test – Characteristics of tinnitus
• Audiometric test – determination of Uncomfortable Listening Level (UCL)
• Audiometric test – whisper test
• Otocoustic emission
• Electronystagmography (ENG)
• Tilt Test
• Videonystagmography (VNG)

Note: As technology advances, the names or methods of specific diagnostic tests may be subject to change, which shall not limit the scope of services provided in this agreement. If as a result of the application of a new method, the above scope of services is extended, then the services resulting from the scope extensions shall not be covered by the scope of the package. Examination results are stored on a medium conforming with the standard applicable in a given facility. Unless stated otherwise, CT, MRI and ultrasound diagnostic imaging includes a 2D image with no additional options (including extended genetic ultrasound).

### Allergy tests – option III

The service includes allergy skin tests, patch tests or contact tests and blood allergy tests. The tests are ordered by a physician from an outpatient Medical Facility indicated by LUX MED, in the following scope:

• Allergist consultation– qualification for tests
• Allergy skin tests – skin prick tests with a product for allergy tests:
  • skin allergy tests – 1 spot
  • skin allergy tests – food allergy panel
  • skin allergy tests – inhaled allergens panel
• Patch/contact tests – patch tests with a product for allergy tests:
  • Patch/contact tests – 1 spot
  • Patch/contact tests – hairdresser panel
  • Patch/contact tests – cosmetic panel
  • patch/contact tests – crural ulceration panel
  • patch/contact tests – basic panel
• Allergy blood tests with taking test samples (blood):
  • IGE SP. Onion F48
  • IGE SP. Chironimus Pluminosus 173
  • IGE SP. Weeds – blend: mugwort (W6), stinging nettle (W20), European goldenrod (W12), ribwort plantain (W9), Chenopodium album (W19)
  • IGE SP. Cladosporium Herbarum M2
  • IGE SP. Chocolate F105
  • IGE SP. Cod F3
  • IGE SP. Brewer’s yeast F403
  • IGE SP. Trees – blend: alder (T2), birch (T3), hazel (T4), oak (T7), willow (T12)
  • IGE SP. Bean F15
  • IGE SP. FP5 – food blend (paediatric): cod (F3), egg white (F1), peanut (F13), cow’s milk (F2), soy (F14), wheat flour (F4)
  • IGE SP. Human ascaris P1
• IGE SP. Gluten (gliadin) F79
• IGE SP. GP4 – late grass blend: sweet vernal grass (G1), perennial rye grass (G5), timothy grass (G6), common reed grass (G7), rye (G12), yorkshire fog (G13)
• IGE SP. Pea F12
• IGE SP. Pear F94
• IGE SP. Buckwheat F11
• IGE SP. Turkey F284
• IGE SP. Apple F49
• IGE SP. Vespuca wasp venom SP.13
• IGE SP. Bee venom 11
• IGE SP. European hornet venom i5
• IGE SP. Lamb (mutton) F88
• IGE SP. Whole egg F245
• IGE SP. Barley F6
• IGE SP. Cocoa F93
• IGE SP. Cockroach – German cockroach i6
• IGE SP. Coffee F221
• IGE SP. Casein F78
• IGE SP. Kiwi fruit F84
• IGE SP. Mosquito i71
• IGE SP. Chenopodium album W10
• IGE SP. Dill 277
• IGE SP. Meadow fescue G4
• IGE SP. Orchard grass G3
• IGE SP. Maize F8
• IGE SP. Chicken F83
• IGE SP. Dust – blend (Bencard)
• IGE SP. Latex K82
• IGE SP. Lepidoglyphus destructor D71
• IGE SP. Common hazel T4
• IGE SP. Carrot F31
• Specific IgE – epidermis blend EP1: dog (E5), cat (E1), horse (E3), cow (E4)
• Specific IgE – mould blend MP1: Alternaria tenuis (M8), Penicillium notatum (M11), Cladosporium herbarum (M2), Aspergillus fumigatus (M3), Candida albicans (M5)
• IGE SP. Cow’s milk – Beta-lactoglobulin F77
• IGE SP. Cow’s milk – alpha-lactalbumin F76
• IGE SP. Mucor racemosus M4
• IGE SP. Mustard F89
• IGE SP. Hamster epidermis E84
• IGE SP. Rabbit epidermis E82
• IGE SP. Guinea pig epidermis E6
• IGE SP. Pigeon droppings E7
• IGE SP. Cucumber F244
• IGE SP. Alder T2
• IGE SP. Hazelnut F17
• IGE SP. Walnut F256
• IGE SP. Peanut F13
• IGE SP. Oak F7
• IGE SP. Inhalant panel
• IGE SP. Mixed panel
• IGE SP. Food panel
• IGE SP. Penicillium notatum M1
• IGE SP. Black pepper F280
• IGE SP. Feather blend EP71: duck feathers (E86), goose feathers (E70), hen feathers, turkey feathers
• IGE SP. Feathers (goose) E70
• IGE SP. Parsley F86
• IGE SP. Duck feathers E86
• IGE SP. Canary feathers E201
• IGE SP. Budgerigar feathers E78
• IGE SP. Orange F33
• IGE SP. Tomato F25
• IGE SP. Wheat F4
• IGE SP. Rye pollen G12
• IGE SP. Mite Dermaphagoides Pteronyss. D1
• IGE SP. Mite Dermaphagoides Farinae D2
• IGE SP. Rice F9
• IGE SP. Celery F85
• IGE SP. Cheddar cheese F81
• IGE SP. Horse hair E3
• IGE SP. Cat fur E1
• IGE SP. Dog coat E2
• IGE SP. Soy F14
• IGE SP. Poplar T14
• IGE SP. Grasses – blend GP1 (orchard grass G3, meadow fescue G4, perennial rye grass G5, timothy grass G6, Kentucky bluegrass G8)
• IGE SP. Strawberry F44
• IGE SP. Tuna F40
• IGE SP. Timothy G6
• IGE SP. Tyrophagus putrescentiae
• IGE SP. Pork F26
• IGE SP. Willow T12
• IGE SP. Beet F27
• IGE SP. Potato F35
• IGE SP. Egg yolk F75
• IGE SP. Rye F5
• IGE SP. – blend FP2 – fish, crustacean, seafood: cod (F3), shrimp (F24), salmon (F41), mussel (F37), tuna (F40)

Note: As technology advances, the names or methods of specific diagnostic tests may be subject to change, which shall not limit the scope of services provided in this agreement. If as a result of the application of a new method, the above scope of services is extended, then the services resulting from the scope extensions shall not be covered by the scope of the package.

Pregnancy care

This service includes monitoring of physiological pregnancy by a physician in outpatient Medical Facilities indicated by LUX MED in accordance with the standards of LUX MED and consists of active health counseling in the field of physiology of pregnancy and childbirth in the following:

- Gynaecologist consultation – pregnancy care
- Fasting glucose
- Glucose 75 g, 1-hour glucose challenge test
- Glucose 75 g, 2-hour glucose challenge test
- Blood group (ABO), RH factor and antibody screening
- Free estriol
- HBs Ab/antibodies
- HBs Ag/antigen
- HCV Ab/antibodies
- HIV-1/HIV-2
- Urine – general analysis
- Blood count + platelet count + automated smear
- Immune antibody screening / alloantibodies (replaces anti-Rh /- antibodies)
- Rubella IgG
- Rubella IgM
- basic syphilis serology (VDRL or USR or anti-TP)
- Standard* Pap smear
- Toxoplasma IgG
- Toxoplasma IgM
- Total Beta-hCG
- Anal and vaginal swab culture for Streptococcus GBS
- Culture for GC (GNC)
- Vaginal swab
- Culture for GC (GNC)
- Endocervical swab
- Obstetric ultrasound;
- transvaginal obstetric ultrasound;
- Transabdominal gynaecological ultrasound
- Transvaginal gynaecological ultrasound

Note: The service does not cover molecular biology tests and ultrasound examinations include only a 2D image with no extended genetic ultrasound. Performance of the above range of services is available based on pregnancy care sheet issued to the Patient by outpatient Medical Facility indicated by LUX MED. The above scope of tests and examinations does not limit the possibility of being referred to tests and examinations not covered by the scheme and agreement, but does not include their cost. This pertains also to cases of the Patient's pregnancy and medical indications for test and examinations not included in the above scheme and the scope of the agreement.
Preventive health check – option I

Preventive health check – option I is an annual (available once during a 12-month term of the agreement) health check, depending on the age and sex of the Patient, including an extended range of examinations and consultations for the Patient over 18 years of age. The health check starts with an internist visit when medical history is taken and referrals for examinations (according to the indications). The health check concludes with an internist consultation, during which the Patient obtains information on their health status and further recommendations.

The scope of the check for women includes:
- Internist consultation — medical history
- Gynaecological consultation
- Cardiological consultation
- Ophthalmological consultation
- Dermatological consultation with standard* dermatoscopy
- Laboratory tests:
  - Urine – general analysis
  - faecal occult blood (FOB);
  - Blood count + platelet count + automated smear
  - ESR
  - GPT/ALT transaminase
- Imaging examinations:
  - Breast ultrasound and Mammography - women, depending on medical indication
- Functional examinations:
  - Echocardiography – cardiac ultrasound
- Internist consultation — closing consultation

The scope of the check for men includes:
- Internist consultation — medical history
- Cardiological consultation
- urological consultation;
- Ophthalmological consultation
- Dermatological consultation with standard* dermatoscopy
- Laboratory tests:
  - Urine – general analysis
  - faecal occult blood (FOB);
  - Blood count + platelet count + automated smear
  - ESR
  - GPT/ALT transaminase
- Imaging examinations:
  - PA chest X-ray - depending on medical indications
- Functional examinations:
  - Resting ECG
- Internist consultation — closing consultation

Note: The service is available in outpatient Medical Facilities indicated by LUX MED. In order to make an appointment for scheme implementation, the Patient should contact using the on-line form available on https://www.luxmed.pl/strona-glowna/kontakt/infolinia.

Physiotherapy - option III

As part of the Physiotherapy option III service, the Patient is entitled to unlimited access to consultations with a physical therapist. The service includes: a medical history interview, a functional examination, the physical therapist’s advice and procedures necessary to make a diagnosis, adopting an appropriate therapeutic decision and determining the mode of rehabilitation. The service only includes rehabilitation of the locomotor system and it is provided for the following indications (qualification criteria); i.e. it applies to Patients with:
- orthopaedic traumas
- osteoarthritis
- occupational disorders of the motor organ (confirmed by a relevant medical certificate)
• neurological pain syndromes
• muscle tone disorders (refers to neurokinesiological rehabilitation for children up to 18 years of age)
• postural defects (refers to postural defects rehabilitation for children up to 18 years of age)

The procedures are provided on the basis of referrals from physical therapists or Physicians (specialists in the field of orthopaedics, neurology, neurosurgery, rheumatology, rehabilitation medicine, balneology) from an outpatient Medical Facility indicated by LUX MED, specifying the scope and type of rehabilitation procedures, and includes physiotherapy services available at outpatient Medical Facilities indicated by LUX MED. The service is unlimited and covers performance of a total of 5 of rehabilitation services (neurokinesiology or postural defects) within a 12-month term of the agreement. Physiotherapy covers the following range of physiotherapy and kinesitherapy procedures:

• Physical therapy – electrical stimulation of muscle of the lower limb
• Physical therapy – electrical stimulation of muscle of the upper limb
• Physical therapy – phonophoresis lumbar spine
• Physical therapy – phonophoresis thoracic spine
• Physical therapy – phonophoresis cervical spine
• Physical therapy – phonophoresis wrist
• Physical therapy – phonophoresis lower leg
• Physical therapy – phonophoresis forearm
• Physical therapy – phonophoresis arm
• Physical therapy – phonophoresis hand
• Physical therapy – phonophoresis shoulder joint
• Physical therapy – phonophoresis hip joint
• Physical therapy – phonophoresis knee joint
• Physical therapy – phonophoresis elbow joint
• Physical therapy – phonophoresis ankle joint
• Physical therapy – phonophoresis foot
• Physical therapy – phonophoresis upper leg
• Physical therapy – galvanisation lumbar spine
• Physical therapy – galvanisation thoracic spine
• Physical therapy – galvanisation cervical spine
• Physical therapy – galvanisation wrist
• Physical therapy – galvanisation lower leg
• Physical therapy – galvanisation forearm
• Physical therapy – galvanisation arm
• Physical therapy – galvanisation hand

• Physical therapy – galvanisation shoulder joint
• Physical therapy – galvanisation hip joint
• Physical therapy – galvanisation knee joint
• Physical therapy – galvanisation elbow joint
• Physical therapy – galvanisation ankle joint
• Physical therapy – galvanisation foot
• Physical therapy – galvanisation upper leg
• Physical therapy – ionophoresis lumbar spine
• Physical therapy – ionophoresis thoracic spine
• Physical therapy – ionophoresis cervical spine
• Physical therapy – ionophoresis wrist
• Physical therapy – ionophoresis lower leg
• Physical therapy – ionophoresis forearm
• Physical therapy – ionophoresis arm
• Physical therapy – ionophoresis hand
• Physical therapy – ionophoresis shoulder joint
• Physical therapy – ionophoresis hip joint
• Physical therapy – ionophoresis knee joint
• Physical therapy – ionophoresis elbow joint
• Physical therapy – ionophoresis ankle joint
• Physical therapy – ionophoresis foot
• Physical therapy – ionophoresis upper leg
• Physical therapy – low-energy laser therapy lumbar spine
• Physical therapy – low-energy laser therapy thoracic spine
• Physical therapy – low-energy laser therapy cervical spine
• Physical therapy – low-energy laser therapy wrist
• Physical therapy – low-energy laser therapy lower leg
• Physical therapy – local cryotherapy wrist
• Physical therapy – local cryotherapy lower leg
• Physical therapy – local cryotherapy forearm
• Physical therapy – local cryotherapy arm
• Physical therapy – local cryotherapy hand
• Physical therapy – local cryotherapy shoulder joint
• Physical therapy – local cryotherapy hip joint
• Physical therapy – local cryotherapy knee joint
• Physical therapy – local cryotherapy elbow joint
• Physical therapy – local cryotherapy ankle joint
• Physical therapy – local cryotherapy foot
• Physical therapy – local cryotherapy upper leg
• Physical therapy – low-energy laser therapy upper leg
• Physical therapy – low-energy laser therapy cervical spine
• Physical therapy – low-energy laser therapy ankle joint
• Physical therapy – low-energy laser therapy forefoot
• Physical therapy – low-energy laser therapy fingers
• Physical therapy – low-energy laser therapy hand
• Physical therapy – low-energy laser therapy foot
• Physical therapy – low-energy laser therapy upper leg
• Physical therapy – magnetic field therapy lumbar spine
• Physical therapy – magnetic field therapy thoracic spine
• Physical therapy – magnetic field therapy cervical spine
• Physical therapy – magnetic field therapy wrist
• Physical therapy – magnetic field therapy lower leg
• Physical therapy – magnetic field therapy forearm
• Physical therapy – magnetic field therapy arm
• Physical therapy – magnetic field therapy hand
• Physical therapy – magnetic field therapy shoulder joint
• Physical therapy – magnetic field therapy hip joint
• Physical therapy – magnetic field therapy knee joint
• Physical therapy – magnetic field therapy elbow joint
• Physical therapy – magnetic field therapy ankle joint
• Physical therapy – magnetic field therapy foot
• Physical therapy – magnetic field therapy upper leg
• Physical therapy – diadynamic currents therapy lumbar spine
• Physical therapy – diadynamic currents therapy thoracic spine
• Physical therapy – diadynamic currents therapy cervical spine
• Physical therapy – diadynamic currents therapy wrist
• Physical therapy – diadynamic currents therapy lower leg
• Physical therapy – diadynamic currents therapy forearm
• Physical therapy – diadynamic currents therapy arm
• Physical therapy – diadynamic currents therapy hand
• Physical therapy – diadynamic currents therapy shoulder joint
• Physical therapy – diadynamic currents therapy hip joint
• Physical therapy – diadynamic currents therapy knee joint
• Physical therapy – TENS currents therapy foot
• Physical therapy – TENS currents therapy upper leg
• Physical therapy – ultrasound therapy lumbar spine
• Physical therapy – ultrasound therapy thoracic spine
• Physical therapy – ultrasound therapy cervical spine
• Physical therapy — ultrasound therapy wrist
• Physical therapy – ultrasound therapy lower leg
• Physical therapy – ultrasound therapy forearm
• Physical therapy – ultrasound therapy arm
• Physical therapy – ultrasound therapy hand
• Physical therapy – ultrasound therapy shoulder joint
• Physical therapy – ultrasound therapy hip joint
• Physical therapy – ultrasound therapy knee joint
• Physical therapy – ultrasound therapy elbow joint
• Physical therapy – ultrasound therapy ankle joint
• Physical therapy – ultrasound therapy foot
• Physical therapy – ultrasound therapy upper leg
• Physical therapy – ultrasound (in water)
• Physical therapy – Trabert’s current therapy lumbar spine
• Physical therapy – Trabert’s current therapy thoracic spine
• Physical therapy – Trabert’s current therapy cervical spine
• Physical therapy – Trabert’s current therapy wrist
• Physical therapy – Trabert’s current therapy lower leg
• Physical therapy – Trabert’s current therapy forearm
• Physical therapy – Trabert’s current therapy arm
• Physical therapy – Trabert’s current therapy hand
• Physical therapy – Trabert’s current therapy shoulder joint
• Physical therapy – Trabert’s current therapy hip joint
• Physical therapy – Trabert’s current therapy knee joint
• Physical therapy – Trabert’s current therapy elbow joint
• Physical therapy – Trabert’s current therapy ankle joint
• Physical therapy – TENS currents therapy ankle joint
The scope of services does not include the costs of physiotherapy for congenital malformations and their consequences, postural defects, perinatal traumas, chronic connective tissue diseases and their consequences, demyelinating diseases and their consequences; neurodegenerative diseases and their consequences; physiotherapy after: surgical procedures not performed as part of the Agreement on the Provision of Health Services concluded with LUX MED or the LUX MED Group Health Insurance for Companies, coronary events, neurological and cerebrovascular events; uro/gynaecological physiotherapy, physiotherapy with highly specialist methods (mechanical and neurophysiological methods, osteopathic techniques), as well as diagnostic and functional training services or corrective gymnastics and fitness services. The scope of services does not include aseptic necrosis physiotherapy, physiotherapy of scars/keloid scars or post-burn conditions, or visceral manipulation – internal organ therapy.

Dentistry – Option III

Dental emergency includes, depending on the Medical Facility, coverage or reimbursement of expenses (Reimbursement) up to the maximum limit of 350 PLN per each 12-month Agreement term, of the following performed by dentists services:

- Emergency tooth pulp devitalisation in a deciduous tooth with cavity dressing
- Emergency tooth pulp devitalisation with cavity dressing
- Emergency dental abscess incision, including drainage
- Emergency periapical abscess decompression
- Emergency tooth pulp devitalisation in a multi-rooted tooth
- Emergency tooth pulp devitalisation in a permanent tooth
- Emergency extraction of a single-rooted tooth
- Emergency extraction of a single-rooted deciduous tooth
- Emergency extraction of a multi-rooted tooth
- Emergency extraction of a multi-rooted deciduous tooth
- Emergency dry socket irrigation + application of medication
- Emergency extraction of a tooth by intra-alveolar chiseling

Note:

Emergency periapical abscess
Emergency dental abscess
Emergency tooth pulp
Emergency extraction of a single-rooted tooth
Emergency extraction of a multi-rooted tooth
Emergency extraction of a multi-rooted deciduous tooth
Emergency dry socket irrigation + application of medication
Emergency extraction of a tooth by intra-alveolar chiseling
- Emergency repositioning and immobilisation of an avulsed tooth
- Emergency dental local infiltration anaesthesia
- Emergency dental local permeation anaesthesia
- Emergency dental intraoral conduction anaesthesia
- Emergency single tooth X-ray

Note: Dental emergency services are provided exclusively in the sudden onset of an illness or in case of an accident outside the working hours of LUX MED’s own facilities. A precondition for obtaining dental emergency services shall be for the patient to notify the need to attend a dental emergency as a result of a sudden onset of an illness or an accident using our Helpline (on 22 33 22 888), and then avail of the services at a medical facility indicated by LUX MED, in line with the instructions provided by the Helpline staff. If the indicated medical facility does not offer cashless services, the patient must cover the costs of the services performed in accordance with the applicable price list, then submit an application for a Reimbursement with attached original invoices or receipts for services provided to the patient. The invoice or receipt should include:

a) the data of the patient for whom services were provided, for the reimbursement of costs (at least the patient’s name, surname, address). In the event that services are provided to a child, the invoice should be issued for the actual carer or legal guardian of the child, and the invoice should include the data of the child for whom the services were performed;

b) a list of services performed for the patient (indicated in the content of the invoice) or an attached specification issued by the medical facility providing the services, indicating the name of the service, or a copy of medical records related to the specific service provided;

c) the number of a specific type of services provided;

d) service performance date;

e) service unit price.

If, following the service cost reimbursement under the LUX MED Reimbursement procedure, LUX MED obtains evidence that the Reimbursement was made upon information, invoices or receipts that are inaccurate given the actual situation indicated in the Application or attached documents (e.g. if the patient submits invoices or receipts for services performed for third parties with the Application), LUX MED shall have the right to claim reimbursement of the amounts paid to the Patient with interest calculated from the date of disbursement of funds under the Reimbursement procedure.

Payment by way of Reimbursement shall be made on the basis of the Refund Application filed by the patient along with accompanying original invoices or receipts and other required documents, submitted within 3 months from the date of the service.

LUX MED shall reimburse the costs to the bank account number indicated in the Application Form within 30 days from the date of delivery of the complete Application Form.

The Reimbursement Application Form constitutes an Appendix to the Agreement and is available at www.luxmed.pl

Dental prophylaxis

Dental prophylaxis is a dental examination that involves assessment of the state of dentition and oral hygiene performed once during a 12-month Agreement term in outpatient Medical Facilities indicated by LUX MED by a Physician specialising in conservative dentistry, and oral hygiene procedures performed by a dental hygienist, and includes the following services:

- Dental consultation
- Dental fluoride treatment (Fluor Protector) 1 dental arch
- Dental fluoride treatment (Fluor Protector) 1/2 of dental arch
- Dental fluoride treatment (Fluor Protector) 2 dental arches
- Instructions on oral hygiene
- Tooth polishing
- Periodontal scaling – complementary
- Periodontal scaling from 1 dental arch
- Periodontal scaling from all teeth
- Deposit removal — sandblasting
- Prophylactic fissure sealing – 1 tooth
- Individual fluoride treatment, topical

Anaesthesia

The service is performed by dentists in outpatient Medical Facilities indicated by LUX MED and covers the following services:

- Dental anaesthesia with a WAND device
- Dental local infiltration anaesthesia
- Dental local permeation anaesthesia
- Dental intraoral conduction anaesthesia

Conservative dentistry

The service is performed by dentists in outpatient Medical Facilities indicated by LUX MED and covers the following services including materials:

- Specialist consultation — conservative dentistry
- Tooth cavity filling 1 surface with regular light-cured material
- Tooth cavity filling 2 surfaces with regular light-cured material
- Tooth cavity filling 3 surfaces with regular light-cured material
- Restoration of damaged incisal angle with regular light-cured material
- Filling — glass ionomer
- Examination of tooth vitality
- Circumpulpular pin inlay
- Cosmetic covering of enamel hypoplasia – composite veneer
- Cosmetic covering of discoloured dentine in anterior teeth – composite veneer
The service is performed by dentists in outpatient Medical Facilities indicated by LUX MED and covers the following services including materials:

**Paedodontics**

- Dental consultation – paedodontal
- Deciduous tooth cavity filling 1 surface
- Deciduous tooth cavity filling 1 surface, therapeutic
- Deciduous tooth cavity filling 2 surfaces
- Deciduous tooth cavity filling 2 surfaces, therapeutic
- Deciduous tooth cavity filling 3 surfaces
- Deciduous tooth cavity filling 3 surfaces, therapeutic
- Adaptation visit (children) – dentistry
- Medicinal dressing on a deciduous tooth
- Dentine impregnation – per tooth
- Amputation of devitalised deciduous tooth pulp
- Endodontic treatment of a deciduous tooth
- Treatment of pulp necrosis in a deciduous tooth
- Vital pulp amputation in a tooth with unformed root
- Tooth pulp devitalisation in a deciduous tooth with cavity dressing

**Dental surgery**

- Specialist consultation – dental surgery
- Dental abscess incision – including drainage
- Apicoectomy of a posterior tooth
- Apicoectomy of a posterior tooth, with retrograde root canal filling
- Apicoectomy of an anterior tooth
- Apicoectomy of an anterior tooth, with retrograde root canal filling
- Single-rooted tooth extraction
- Single-rooted deciduous tooth extraction
- Extraction of a tooth by extra-alveolar chiselling
- Extraction of a tooth by extra-alveolar chiselling with formation of a mucoperiosteal flap
- Multi-rooted tooth extraction
- Multi-rooted deciduous tooth extraction
- Excision of a gingival flap within 1 tooth
- Excision of nodule, nodule-like lesion, mucocele – dentistry
- Surgical dressing – dentistry
- Dry socket irrigation + application of medication
- Sampling of a biopsy specimen in the oral cavity
- Frenuloplasty, meloplasty, glossoplasty – dentistry
- Enucleation of odontogenic cyst
- Surgical tooth extraction – surgically complex
- Surgical exposure of an impacted tooth
- Surgical exposure of an impacted tooth with bracket attachment
- Surgical extraction of a partially impacted tooth
- Repositioning and immobilisation of an avulsed tooth

In addition, the patient is entitled to a 15% discount off the price list of the facility for the following services:

- Tooth reimplantation
- Alveoloplasty within a half of maxilla – preparation for prosthetic restoration
- Alveoloplasty with a transplant – excluding cost of material
- Repositioning and immobilisation of a fractured alveolar process
- Removal of salivary duct calculus – dentistry
- Closure of oroantral communication or fistula
- Temporary management of fractured maxilla
- Repositioning and immobilisation of an avulsed mandible
- Maxillary sinus 1 augmentation
- Maxillary sinus 2 augmentation
- Maxillary sinus 3 augmentation
- Connective tissue transplant from a palate – sampling
- Connective tissue transplant from a palate – sampling
- Inferior alveolar nerve transposition
- Bone augmentation 1
- Bone augmentation 2
- Bone augmentation 3
- Emdogain and Endobon implantation procedure
- Flap procedure with augmentation with Endobon preparation
- Flap procedure with augmentation with Endobon preparation and Osseoguard membrane
- Flap procedure with augmentation using Endobon and Emdogain
- Alveolar regeneration / augmentation following extraction using biomaterial
- Stitching a lip wound
- Surgical removal of tooth buds
- Alveolar regeneration / augmentation following extraction using collagen cones
- Autogenic bone transplant to 3 alveoli
- Replenishment of the alveolus with bone replacement material, excluding cost of material
In addition, the patient is entitled to a 15% discount off the price list of the facility for the following services:

**Endodontics**

The service is performed by dentists in outpatient Medical Facilities indicated by LUX MED and covers the following services:

- Specialist consultation — conservative dentistry
- Tooth pulp devitalisation with cavity dressing
- Chemical and mechanical root canal preparation
- Root canal opening
- Root canal filling
- Endodontal treatment of an incisor or a canine under a surgical microscope stage I
- Endodontal treatment of a premolar under a surgical microscope stage I
- Endodontal treatment of a premolar under a surgical microscope stage II
- Endodontal treatment of a molar under a surgical microscope stage I
- Endodontal treatment of a molar under a surgical microscope stage II
- Specialised assessment of tissue under a surgical microscope
- Interventional appointment during endodontic treatment

**Prosthodontics**

The service is performed by dentists in outpatient Medical Facilities indicated by LUX MED and covers the following services:

- Specialist prosthetic consultation
- Full denture with metal palate
- Maloclusion correction
- Models for diagnostic or planning purposes – doctor
- Crown-root inlay cast metal
- Crown-root inlay cast metal combined
- Crown-root inlay made of gold
- Crown-root inlay made of gold combined
- Metal, ceramic, glass fibre crown-root inlay – standard
- Provisional crown using indirect method
- All-metal cast crown
- All-gold cast crown, premolar
- Porcelain crown on metal without margin
- Porcelain crown on gold, premolar
- Porcelain veneer
- Composite crown ONLAY INLAY OVERLAY
- Galvanised telescopic crown, gold
- Latch / bolt / retainer point in frame denture
- Replacement of Rhein inlay – 1 element
- Partial denture supporting 1–4 missing teeth
- Full maxillary denture
- Full mandibular denture
- Frame denture with latches without latch cost
- Frame denture
- Overdenture on gold latch
- Denture repair – 1 element
- Direct denture lining
- Indirect denture lining
- Removal of a prosthetic crown – 1 element
- Partial denture supporting 5–8 missing teeth
- Partial denture supporting more than 8 teeth
- Porcelain crown on gold, molar
- Porcelain crown on gold, anterior tooth
- All-gold cast crown, molar
- All-gold cast crown, anterior tooth
- Porcelain crown ONLAY INLAY OVERLAY
- Cementation of a prosthetic crown
- Cementation of a bridge
- Partial denture – 1 point
- Occlusion alignment using articulator
- Functional impression using individual tray
- All-ceramic crown-root inlay
- Crown-root inlay cast metal Stage I
- Crown-root inlay cast metal Stage II
- Crown-root inlay cast metal combined Stage I
- Crown-root inlay cast metal combined Stage II
- Crown-root inlay made of gold Stage I
- Crown-root inlay made of gold Stage II
- Crown-root inlay made of gold combined Stage I
- Crown-root inlay made of gold combined Stage II
- All-metal cast crown Stage I
- All-metal cast crown Stage II
- All-gold cast crown, premolar Stage I
- All-gold cast crown, premolar Stage II
- All-gold cast crown, molar Stage I
• All-gold cast crown, molar Stage II
• All-gold cast crown, anterior tooth Stage I
• All-gold cast crown, anterior tooth Stage II
• Porcelain crown on metal without margin, Stage I
• Porcelain crown on metal without margin, Stage II
• Porcelain crown on galvanised metal Stage I
• Porcelain crown on galvanised metal Stage II
• Porcelain crown on gold premolar tooth Stage I
• Porcelain crown on gold premolar tooth Stage II
• Porcelain crown on gold molar tooth Stage I
• Porcelain crown on gold molar tooth Stage II
• Porcelain crown on gold, anterior tooth Stage I
• Porcelain crown on gold, anterior tooth Stage II
• Porcelain veneer Stage I
• Porcelain veneer Stage II
• Porcelain crown OVERLAY Stage I
• Porcelain crown OVERLAY Stage II
• Galvanised telescopic crown, gold Stage I
• Galvanised telescopic crown, gold Stage II
• Latch / bolt / retainer point in frame denture Stage I
• Latch / bolt / retainer point in frame denture Stage II
• Partial denture supporting 1–4 missing teeth Stage I
• Partial denture supporting 1–4 missing teeth Stage II
• Partial denture supporting 5–8 missing teeth Stage I
• Partial denture supporting 5–8 missing teeth Stage II
• Partial denture supporting more than 8 teeth Stage I
• Partial denture supporting more than 8 teeth Stage II
• Full maxillary denture Stage I
• Full maxillary denture Stage II
• Full mandibular denture Stage I
• Full mandibular denture Stage II
• Frame denture with latches without latch cost Stage I
• Frame denture with latches without latch cost Stage II
• Frame denture Stage I
• Frame denture Stage II
• WAX UP
• WAX UP INTERDENT
• All-ceramic crown-root inlay Stage I
• All-ceramic crown-root inlay Stage II
• Adhesive bridge – 1 point
• Porcelain crown on zirconia using CADCAM Lava Everest method
• Porcelain crown on zirconia using CADCAM Lava Everest method Stage I
• Porcelain crown on zirconia using CADCAM Lava Everest method Stage II
• Porcelain crown on metal with a ceramic margin Stage I
• Porcelain crown on metal with a ceramic margin Stage II
• Metal telescopic crown
• Metal telescopic crown Stage I
• Metal telescopic crown Stage II
• Porcelain veneer posterior
• Porcelain veneer posterior Stage I
• Porcelain veneer posterior Stage II
• Overdenture on gold latch Stage I
• Overdenture on gold latch Stage II
• Gradia gingival mask
• Gradia gingival mask Stage I
• Gradia gingival mask Stage II
• Wax teeth control and correction
• Frame denture metal control and correction
• Splint denture
• Metal crown OVERLAY
• Gold crown inlay
• Spherical inlays
• Protective splint sport
• Protective splint sport colour
• Silver-palladium crown-root inlay
• Silver-palladium crown-root inlay Stage I
• Silver-palladium crown-root inlay Stage II
• Silver-palladium crown-root inlay combined
• Silver-palladium crown-root inlay combined Stage I
• Silver-palladium crown-root inlay combined Stage II
• Models for diagnostic or planning purposes – doctor
• Reinforcement of a denture with an arch
• Reinforcement of a denture with a steel mesh
• Reinforcement of a denture with a gold-plated mesh
• Overdenture on telescopic crowns Stage I
• Overdenture on telescopic crowns Stage II
• ASC bracket
• Face-bow examination and placement in articulator
• Acrylic microdenture
• 1 arch MOCK UP
• 1 point MOCK UP
• Visualisation of prosthodontic treatment on a model
• Teflon replacement
• All-composite crown
• Composite crown on glass fibre
• All-porcelain crown on zirconia
• All-porcelain crown on zirconia Stage I
• All-porcelain crown on zirconia Stage II
• All-porcelain crown Stage I
• All-porcelain crown Stage II
• Marylandmissing tooth restoration – acrylic
• Marylandmissing tooth restoration – composite

Orthodontics
The service is performed by dentists in outpatient Medical Facilities indicated by LUX MED and covers the following services:
In addition, the patient is entitled to a 15% discount off the price list of the facility for the following services:

- Wide-arch braces Bi-helix, Quad – helix
- Block braces with modification
- Derichsweiler apparatus
- Removable braces
- Fixed braces – closed metal 1 arch
- Stochfisch braces
- One brace of metal, transparent braces
- One brace of metal, fixed braces
- Lip-bumper
- Braces repair, arch wire replacement
- Braces repair, 1 screw replacement
- Braces repair, 2 screws replacement
- Braces repair, plate breakage
- Braces repair, addition of a wire element
- Nance plate
- Vestibular plate
- Chin cap
- Palatal expander
- NiTi palatal expander
- Retainer 1
- Retainer 2
- Retainer 3
- Orthodontist consultation in the course of treatment with removable braces
- Orthodontist consultation in the course of treatment with fixed braces
- Headgear
- Removal of fixed braces
- Visit with a chin cap
- Visit with cusp grinding
- Occlusal analysis and treatment plan development
- Block braces
- One wire arch of fixed braces porcelain brackets
- One wire arch of fixed metal braces
- Orthodontist's consultation with an impression
- Braces repair replacement of 1 element
- Braces repair replacement of 2 elements
- Braces repair replacement of 3 elements
- Visit with a vestibular plate
- Follow-up visit in the course of treatment with removable braces
- Follow-up visit in the course of treatment with fixed braces x 1
- Replacement of a metal bracket
- Replacement of a porcelain bracket
- 1/3 segment arch
- 1/2 segment arch
- Follow-up visit – fixed braces, metal brackets
- Follow-up visit – fixed braces, crystal brackets
- One wire arch of fixed braces crystal brackets
- One wire arch of fixed braces metal brackets
- Removable braces – Schwarz plate
- Fixed braces – aesthetic brackets 1 arch
- Hyrax braces
- Pendulum braces
- Fixed braces – aesthetic brackets part of arch 1
- Fixed braces – aesthetic brackets part of arch 2
- Wide-arch braces Bi-helix, Quad – helix Stage I
- Wide-arch braces Bi-helix, Quad – helix Stage II
- Block braces Stage I
- Block braces Stage II
- Removable braces – Schwarz plate Stage I
- Removable braces – Schwarz plate Stage II
- Hyrax braces Stage I
- Hyrax braces Stage II
- One wire arch of fixed brace with crystal brackets Stage I
- One wire arch of fixed brace with crystal brackets Stage II
- One wire arch of fixed braces with metal brackets Stage I
- One wire arch of fixed braces with metal brackets Stage II
- Braces repair
- Pendulum braces Stage I
- Pendulum braces Stage II
- Nance braces
- Retention control
- Stripping – 1 tooth
- Acrylic bite splint
- Headgear application
- Retention plate
- Retention arch application – maxilla
- Retention arch application – mandible
- Removal of retention arch
- Fixed braces – metal, non-ligature brackets 1 arch
- Fixed braces – aesthetic, non-ligature brackets 1 arch
- TWIN-BLOCK braces
- TWIN-BLOCK braces Stage I
- TWIN-BLOCK braces Stage II
- Follow-up visit – fixed braces, porcelain brackets
- Hass braces
- Space maintainer
- Clear aligner impression
- Clear aligner follow-up
- Braces repair, 1 arch wire replacement ceramic brackets
- Braces repair, 2 arch wires replacement ceramic brackets
- Braces repair, 1 arch wire replacement metal brackets
- Braces repair, 2 arch wires replacement metal brackets
- Additional orthodontic element 1
- Additional orthodontic element 2
- Additional orthodontic element 3
- Replacement of an aesthetic bracket
- Vestibular plate – infant trainer
- Fixed braces – aesthetic, non-ligature Damon brackets 1 arch
- Fixed braces – metal, non-ligature Damon brackets 1 arch
- Follow-up visit in the course of treatment with fixed braces with non-ligature Damon brackets – 1 arch
- One wire arch of fixed braces metal and crystal brackets
- One wire arch of fixed braces metal and crystal brackets Stage I
- One wire arch of fixed braces metal and crystal brackets Stage II
- Multi-P braces
- Multifunctional braces Molar rotator
- Expander braces
In Periodontology

The service is performed by dentists in outpatient Medical Facilities indicated by LUX MED with a 15% discount off the price list of the facility for the following services:

- Treatment of oral mucosa lesions – ozonotherapy – doctor
- Simple curettage within 1/4 of dental arch
- Open curettage within 1 tooth
- Teeth immobilisation with wire ligature – tooth
- Teeth immobilisation with composite splint – 1 tooth
- Teeth immobilisation with composite splint with additional reinforcements – 1 tooth
- Biomaterial implantation procedure 1
- Emdogain implantation procedure 1 tooth
- Covering exposed teeth roots procedure
- Periodontal dressing
- Attachment of a metal bracket
- Attachment of a crystal bracket
- Retention arch application
- Fixed aesthetic braces 2x4
- Fixed aesthetic braces 2x4 Stage I
- Fixed aesthetic braces 2x4 Stage II
- One wire arch of fixed braces nickel-free brackets
- One wire arch of fixed braces nickel-free brackets Stage I
- One wire arch of fixed braces nickel-free brackets Stage II
- Retainer arch 1 tooth
- Orthognathic treatment planning
- Plate denture for children
- Plate denture for children Stage I
- Plate denture for children Stage II
- Retainer arch 6 teeth
- Models for diagnostic or planning purposes – orthodontist

In addition, the patient is entitled to a 15% discount off the price list of the facility for the following services:

- Treatment of oral mucosa lesions – ozonotherapy – dental hygienist
- Biomaterial implantation procedure 2
- Biomaterial implantation procedure 3
- Emdogain implantation procedure 2 teeth
- Emdogain implantation procedure 3 teeth

Biological dentistry

The service is performed by dentists in outpatient Medical Facilities indicated by LUX MED with a 15% discount off the price list of the facility for the following services:

- Saliva-Check Buffer (GC) test
- Streptococcus mutans saliva concentration using Saliva-Check Mutans (GC)
- Tri Plaque ID Gel (GC) control
- Molecular and biological assay for pathogens causing periodontitis/periimplantitis using Real-Time PCR – PET standard (MIP PHARMA) method
- Molecular and biological assay for pathogens causing periodontitis/periimplantitis using Real-Time PCR – PET plus (MIP PHARMA) method
- Molecular and biological assay for pathogens causing periodontitis/periimplantitis using Real-Time PCR – PET deluxe (MIP PHARMA) method
- Tooth decay infiltration – ICON (DMG)
- Minimally invasive tooth decay treatment using glass hybrid technology – EQUIA FORTE
- Application of bioactive dentin substitute – Biodentine (Septodont)
- Bioreconstruction of lost tooth tissue using ACTIVA (Pulpdent)
- Restoration of lost tooth tissue using BPA-free Gaenial
- Local application of Mi VARNISH (GC) releasing bioavailable calcium, phosphate and fluoride
- Maintenance treatment using bioavailable calcium, phosphate and fluoride – GC MI Paste Plus
- Enamel remineralisation with a Tooth Mousse preparation
Implantology

The service is performed by dentists in outpatient Medical Facilities indicated by LUX MED and covers the following services:

- Specialist implantological consultation

In addition, the patient is entitled to a 10% discount off the price list of the facility for the following services:

- Implant splint with titanium positioners
- Implant uncovering with a healing screw 1 point
- Insertion of a micro implant
- Insertion of an Astra implant
- Insertion of a Straumann implant
- Removal of a micro implant
- Insertion of an Astra implant and support one-stage
- Insertion of a BEGO implant
- Removal of a permanent implant
- Insertion of Dentium implant
- Insertion of Neodent implant
- Insertion of Straumann SL Active implant
- Implant splint, model
- Titanium bar on 6 implants
- Zirconium bar on implants 4–5 implants
- Zirconium bar on implants 4–5 implants Stage I
- Zirconium bar on implants 4–5 implants Stage II
- Zirconium bar on implants 6–8 implants
- Zirconium bar on implants 6–8 implants Stage I
- Zirconium bar on implants 6–8 implants Stage II
- Zirconium bridge on implants 6–8 implants Stage II
- Porcelain crown on implant, two-structure on steel
- Porcelain crown on implant, two-structure on steel Stage I
- Porcelain crown on implant, two-structure on steel Stage II
- Porcelain bridge on implants 1 arch
- Porcelain bridge on implants 1 arch Stage I
- Porcelain bridge on implants 1 arch Stage II
- Toronto acrylic bridge on implants 1 arch
- Toronto acrylic bridge on implants 1 arch Stage I
- Toronto acrylic bridge on implants 1 arch Stage II
- Renovation of Toronto acrylic bridge on implants, acrylic replacement
- Denture on 4 implants with locators
- Denture on 4 implants with locators Stage I
- Denture on 4 implants with locators Stage II
- Denture on 4 implants with a bar
- Denture on 4 implants with a bar Stage I
- Denture on 4 implants with a bar Stage II
- Denture on 2 implants with a bar
- Denture on 2 implants with a bar Stage I
- Denture on 2 implants with a bar Stage II
- Denture on 2 implants with locators
- Denture on 2 implants with locators Stage I
- Denture on 2 implants with locators Stage II
- Provisional immediate crown on an implant made by a dentist
- Preparation of a written plan and costs of periodontal treatment
- Regular curettage within 1 tooth
- Root planning 1/2 arch
- Periodontology Flap (1 tooth)
- Vector periodontal apparatus procedure 2 arches
- Vector periodontal apparatus procedure 1 arch
- Vector prosthetic apparatus procedure 2 arches
- Vector prosthetic apparatus procedure 1 arch
- Vector prosthetic apparatus procedure 1 tooth (1 to 6 teeth)

Treatment of functional disorders of the masticatory apparatus

The service is performed by dentists in outpatient Medical Facilities indicated by LUX MED with a 10% discount off the price list of the facility for the following services:

- Soft dental guard
- Hard dental guard
- NTI dental guard
- Oral cancer ViziLite screening test

- Tooth whitening Smile Laser 1 arch
- Tooth whitening Smile Laser 2 arches
- Tooth whitening Smile Laser supplementation
- Teeth whitening using external method – 1 syringe – dental hygienist
- Teeth whitening using external method – supplemental set – dental hygienist
- Teeth whitening Beyond lamp 1 dental arch
- Teeth whitening Beyond lamp 2 dental arches
- Whitening of group of teeth using external method – 1 dental arch using LED lamp

Dental X-ray (medium conforming with the standard applicable in a given medical facility):

The service includes provision of the following services in outpatient Medical Facilities indicated by LUX MED, based on a referral from a dentist from these facilities, and includes the following services:

- Single tooth X-ray
- Panoramic X-ray

Guarantee

The patient is provided with a 24-month guarantee for final conservative fillings used in permanent teeth. A precondition to obtaining the guarantee is to attend follow-up visits in outpatient Medical Facilities indicated by LUX MED at least once in the 12-month Agreement term or according to an individually agreed schedule, and undergo tartar and deposit removal and fluoride treatment procedures once in the 12-month Agreement term or according to an individually agreed schedule in outpatient Medical Facilities indicated by LUX MED, compliance with dentist’s recommendations, maintaining oral hygiene as instructed by the dentist and/or dental hygienist.

Note: The guarantee does not cover conditions occurring as a result of: non-attendance at follow-up and prophylaxis visits, non-compliance with dentist’s recommendations, mechanical injuries, accidents, missing posterior teeth (lack of support zones), pathological dental wear (bruxism) or other functional impairments of the masticatory apparatus, physiological bone atrophy and periodontal lesions, general co-morbidities affecting the stomatognathic system (diabetes, osteoporosis, epilepsy, history of radiotherapy and chemotherapy), or temporary fillings (e.g. provided until a prosthesis is prepared).

The Dentistry Option III service does not cover services provided under general anaesthesia.

Home visits – option II

The service encompasses internal diseases, paediatrics or family medicine and is performed at the place of residence of the Patient, exclusively in situations where the Patient is unable to get to the outpatient Medical Facility indicated by LUX MED due to sudden onset of an illness or sudden exacerbation, excluding direct life-threatening situations. Reasons making it impossible for the Patient to report to the clinic do not include inconvenient access to the outpatient Medical Facility indicated by LUX MED, obtaining a prescription or a medical certificate.

A house call is an emergency service provided solely on the visit request day and aimed at making a diagnosis and starting treatment, whereas treatment continuation and follow-up visits take place in outpatient Medical Facilities indicated by LUX MED. In the case of a home visit, it is impossible to freely choose the physician. A house call request is accepted or refused by a medical dispatcher (indicated by LUX MED) based on the information provided. Home visits are available within the administrative boundaries of cities and their surrounding areas, where there are outpatient Medical Facilities indicated by LUX MED for the service – a detailed territorial coverage is described on www.luxmed.pl.

Nursing care away from medical centers

The service is offered when the Patient is unable to arrive in an outpatient Medical Facility indicated by LUX MED due to their medical condition, based on recommendation of a physician from the facility. Inconvenient access to facility is not a sufficient reason to perform the service. The service is performed by a nurse (a limit of 10 nurse visits within a 12-month term of the agreement) at the place of residence of the Patient and includes procedures that do not require the presence of a physician, in the following scope: performance of a nursing service (injection);

- drawing blood for analysis
- mounting Holter ECG monitor (for 24h) in the Patient’s house
- insertion/replacement of Foley catheter
- dressing change

The service includes: traditional gauze or cotton wool wound dressings, bandages, cannulae, syringes, cotton swabs, adhesive strips, needles, disinfection agents used for the above procedures. Nursing services are available every day, from 8 am to 8 pm. The service is available within the administrative boundaries of cities and their surrounding areas - where there are medical facilities indicated by LUX MED. The detailed information on territorial coverage can be found on www.luxmed.pl. Services are elective and are not performed in emergency cases. The request should be submitted to the dispatcher at least 24 h before performing the service.
Second Medical Opinion

The service provided in cooperation with WorldCare International Inc. with its registered office in Boston (Massachusetts; the U.S.) enables you to discuss your diagnosis and treatment plan with specialists collaborating with internationally recognised academic medical centres in the U.S. comprising the WorldCare Consortium, the list of which is available on the website https://www.worldcare.com/worldcare-consortium-2/, and to obtain a second medical opinion without leaving Poland. The opinion is issued for the following illnesses and conditions in which a diagnosis was made, injury was found or the need to perform surgical treatment or procedure was identified:

- Cancer
- Heart attack
- Coronary artery disease requiring surgery
- Coma
- Stroke
- Multiple sclerosis
- Paralysis
- Chronic obstructive pulmonary disease
- Emphysema
- Inflammatory bowel disease
- Chronic liver disease
- Renal insufficiency
- Chronic Pelvic Pain
- Diabetes
- Thrombophlebitis and embolism
- Any amputation
- Rheumatoid arthritis
- Major burns
- Sudden blindness due to sickness
- Major organ transplantation
- Neuro-degenerative disease/Alzheimer’s disease
- Deafness
- Hip and knee replacement
- Loss of speech
- Major trauma
- Parkinson’s disease

Each submission falling within the above scope is comprehensively analysed in leading medical centres in the U.S. The team of specialists, on the basis of medical records as well as imaging and histopathological examination results, reviews the diagnosis and treatment plan suggested by the primary doctor of the Patient, and then presents a detailed report which may confirm the previous diagnosis and the way of treatment or recommend changing them. The report contains the description of the case, diagnosis, recommendations for further treatment, the list of questions to be discussed by the Patient with his/her physician, information on the specialist and institution issuing a second medical opinion – translated into Polish, as well as data on the latest scientific research and educational materials concerning the case. As part of the service, the Patient may, within 30 days from receiving a second medical opinion, ask additional questions referring to a given illness, the answer to which will be provided electronically. If necessary, in order to discuss the case of the Patient, there is a possibility of holding audio conference between the primary doctor and the specialist issuing a second opinion.

In order to get a second medical opinion, contact WorldCare in Poland by calling 22 133 65 01.

Note: In order to use the Medical Second Opinion service, the Patient must be eligible to receive Health Services under the Benefit Plan covering this service for an uninterrupted period of at least 90 days.

Medical case consultation

The service includes the arrangement of medical case consultation for the Patient in Poland, consisting of prominent Polish doctors. This service is available only for complicated medical cases and its purpose (if possible) will be to determine further diagnostic and therapeutic management of the Patient. The fees of consultation participants are covered by the Patient with a 30% discount.

Sports Medicine Programme

Sports Medicine Programme is dedicated to Patients from the age of 6 years, from the age of 8 years or from the age of 18 years which results from the content of this scope. Services covered by Sports Medicine Programme are performed in selected healthcare centers indicated by LUXMED and described on the website www.luxmed.pl/program-medycyny-sportowej-placowki. The scope of services which are available under Sports Medicine Programme in the selected healthcare centers, which are mentioned above and indicated by LUXMED, may vary depending on location.

The programme includes:

Doctor consultations in sports medicine — from the age of 6 years

The service includes unlimited no-referral access to doctor consultations within the scope of the following specializations:

- sports medicine specialist
- PTMS-certified specialist

Note: Consultations in sports medicine which are provided by a sports medicine doctor or an PTMS-certified (Polish Society of Sports Medicine) specialist are related to sports medicine in the scope of: sports medical examinations which are preformed to identify indications and contraindications to playing sport and increased physical activity, health balance of professional athletes, amateur athletes and physically active persons, prevention of trauma resulting from playing sport, specfication of a preliminary diagnostic and therapeutic process, disturbances of post-work out regeneration, certificates for sports schools, sports camps. Consultations in sports medicine do not include sports judicial decisions.
Sports judicial decisions — from the age of 6 years

The service includes unlimited no-referral access to sports judicial decisions in the scope of preliminary examinations, periodic examinations and follow-up examinations for disciplines such as motor sports, diving, judo, wrestling, MMA, jujitsu and other martial sports, boxing, taekwondo, kickboxing and other martial sports weightlifting and other disciplines (e.g. team sports such as football, volleyball). Depending on your sports disciplines and type of examination (preliminary, periodic, follow-up), the following consultations and diagnostic tests are performed every 6 months:

- Doctor consultations in the scope of the following specializations:
  - laryngology (specifically for: diving)
  - neurology (specifically for: taekwondo, boxing, MMA, jujitsu and other martial sports)
  - sports medicine specialist and judicial decisions

- Laboratory tests:
  - Basic blood tests with sample (blood) collection:
    - Blood count + platelet count + automated smear
    - Glucose / fasting glucose
  - Urinalysis with sample (urine) collection:
    - Urine – general analysis

- Functional examinations:
  - ECG at rest
  - Spirometry (specifically for: diving)

- Nursing procedures:
  - Blood pressure measurement
  - Eye acuity test (near-sighted and far-sighted with Snellen charts)
  - Anthropometric measurements
  - Dental examinations

Judicial examinations are performed in compliance with standard of sport judicial examinations of LUXMED prepared in accordance with the current guidelines of the Central Institute of Sports Medicine (Centralny Ośrodek Medycyny Sportowej) and in collaboration with Polish Society of Sports Medicine. The scope of tests performed depends on the sports discipline practiced and the time when the tests are performed, according to the guidelines included in the Regulation of the Minister of Health of 22 July 2016 on qualifications of physicians authorized to issue sports judicial decisions to competitors regarding their health condition and the scope and frequency of required medical examinations necessary to obtain these judicial decisions. Judicial decision is made by sports medicine specialist; however, as long as a patient is under the age of 23 years, it can be issued also by a doctor who is certified by Polish Society of Sports Medicine (Polskie Towarzystwo Medycyny Sportowej, PTMS). In the case of an amendment to legal regulations concerning sports jurisprudence, services within the aforementioned scope, including the scope of tests, may change as a result of their adaptation to the generally applicable provisions of the law.

Note: An athlete participating in sports competition organized by sports associations in compliance with art. 37, section 7 of the Act on Sports dated of 25.06.2010, shall be submitted to general specialist and diagnostic examinations in the scope which is essential to make a judicial decision on health condition ensuring safe participation in sports competition, in particular, participation in trainings or sport competitions. In order to issue a sports judicial decision, the sports medicine specialist, taking into account the patient’s individual health condition, may prescribe additional tests exceeding the scope of services described above.

Functional Movement Screen — from the age of 8 years

The service includes unlimited no-referral access to movement quality assessment by a certified physiotherapist, which includes examination of joint mobility, neuromuscular control, local and global stability and quality of proper motor patterns. The assessment is performed in compliance with LUXMED standards for FMS tests.

Cardio Sport Programme — Basic Cardiology Diagnostics — from the age of 18 years

The service includes unlimited no-referral access to the following tests and examinations under the Cardio Sport Programme. The programme is dedicated to active people and enables to perform a preliminary assessment of the risk of heart problems within basic diagnostics.

The following diagnostic tests are performed under the programme:

- Body composition analysis
- Laboratory tests:
  - Blood tests with sample (blood) collection:
    - Blood count + platelet count + automated smear
    - Fasting glucose
  - Creatinine
  - Lipid profile

- Functional examinations:
  - ECG at rest
  - Cardio Sport exercise ECG with discussion of the results obtained, recommendations for the future and a certificate of the physician performing the examination.

Note: The programme does not assess all predispositions to sport associated with increased level of exertion and intensity. Cardio Sport exercise ECG is performed when a physician assessing the patient’s resting ECG confirms a lack of medical contraindications for the performance of the examination. The programme is completed with a certificate of no cardiology contraindications for amateur sports activity of increased effort. The certificate issued is not an opinion issued within sports medicine examinations.
Insurance against medical treatment costs during travel

Insurance cover is provided for all countries in the world except for the Republic of Poland and the Insured’s country of residence provided that a single stay of the Insured outside of the Republic of Poland or the Insured’s country of residence does not exceed 180 days.

Insurance against medical treatment costs covers any costs essential to restore health to allow the Insured to return to the Republic of Poland or the Insured’s country of residence.

The scope and amounts of Insurance:

<table>
<thead>
<tr>
<th>Scope of insurance</th>
<th>Liability limit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Consequences of an accident (death, disability, damage to one’s health)</td>
<td>PLN 200,000 in the case of death PLN 100,000 for 100% damage to one’s health PLN 1 000 for 1% damage to one’s health</td>
</tr>
<tr>
<td>Treatment and assistance costs (described in the Special Terms and Conditions of Insurance)</td>
<td>PLN 300,000 PLN 2000</td>
</tr>
<tr>
<td>Sublimit for dental treatment costs</td>
<td>PLN 200,000</td>
</tr>
<tr>

<td></td>
</tr>
<tr>
<td>- loss or</td>
<td>PLN 2,500</td>
</tr>
<tr>
<td>- damage</td>
<td>PLN 2,500</td>
</tr>
</tbody>
</table>

The insurance also covers:

- risks associated with sports, including but not limited to: skiing, snowboarding, windsurfing, kitesurfing and diving without an aqualung;
- costs of treatment associated with pregnancy and complications during pregnancy until the 32nd week of pregnancy;
- exacerbations and complications of all chronic diseases;
- costs of treatment in the event of unexpected war or act of terror.

In order to join insurance against medical treatment costs during foreign travel one needs to sign up via the application form available at www.turystyka.allianz.pl/luxmed.

Detailed information concerning the insurance and rules regarding entering into the insurance agreement can be found in the Special Terms and Conditions of Insurance during foreign travels for LUX MED Key Customers; information for the patient available at www.luxmed.pl.

Hospitalisation consultant

Based on the knowledge about the market of medical providers and many years of experience in the organization of hospital care, we offer consultancy in the field of hospital services to patients referred to the hospital. We offer a 24-hour specialised call centre with medical professionals providing information related to the organization of hospital admissions, both within the scope of services financed publicly and commercially. Thanks to the data base on hospitals and one-day surgery centres, we provide up-to-date information about the feasibility of treatment funded by the National Health Fund (NFZ) (waiting time, necessary requirements for referrals) and available commercial alternatives (approximate cost of treatment). It provides a basis for the rational choice of implementation of the recommended hospital treatment.

If the Patient is entitled to treatment or hospitalization under the insurance, the hotline staff verifies which treatments may be performed as part of the coverage, and then helps to arrange consultation to determine eligibility for the surgery and the therapeutic procedure itself.

The service is available at the facilities cooperating with LUX MED, located in major Polish agglomerations (Warszawa, Kraków, Wrocław, Łódź, Poznań, Katowice, Gliwice, Gdańsk, Gdynia).

The service applies to referrals to treatment in the following wards: internal medicine, general surgery, orthopedics and traumatology, cardiology, ENT, gynecology, urology, pediatrics, ophthalmology.

<td>The hotline consultant collects from the Patient medical history on medical needs, conditions and treatment needs. The Consultant establishes what medical documentation the Patient possesses, in particular, whether he or she has a referral.</td>
</tr>
<tr>
<td>Information on possible procedures</td>
<td>Based on the information received, the employee clearly informs about a possible benefits gaining procedure (e.g. a valid referral from a specialist clinic and a qualification consultation are necessary for hospital treatment). The Consultant also provides information on further consultations which must precede the hospital treatment and most probably will be needed and answers any questions. If necessary, the hotline employee discusses further actions with a physician.</td>
</tr>
<tr>
<td>In the event of doubts – assistance in determining medical examination</td>
<td>If it is necessary to assess the Patient’s health status during a medical examination in order to establish the scope of required treatment, the hotline consultant recommends an appointment with a specialist in a relevant medical field.</td>
</tr>
</tbody>
</table>
Information on the hospitals
Information on the estimated cost of treatment
Information about the recommendations before procedures

The hotline employee provides information about the most convenient possible locations for the treatment, close to the Patient’s place of residence, as part of publicly funded services (under contract with the National Health Fund), as well as chargeable services. In the case of chargeable treatment, the hotline consultant informs about the approximate cost, possible to estimate based on provided information.

The hotline consultant informs the Patient about typical recommendations before planned surgeries (e.g. necessary vaccinations, diagnostic tests).

Sudden cases
If the medical history indicates the need for urgent medical intervention, the hotline consultant may offer a home visit of a physician or inform the Patient the need to call an ambulance or go to the Hospital Emergency Ward urgently.

Data base on medical centres providing a given treatment
Experts continuously monitor hospitals across the country, in terms of provided treatment, used methods and introduced innovations and facilities. Thanks to that, we can professionally advise on a facility specialising particularly in a given disease treatment or performing a relevant type of procedures.

We have a current and professionally verified knowledge database on hospital services and medical specialists who will help to suggest the most appropriate facility for a given medical problem.

Treatment under the National Health Fund (NFZ) and commercial treatment
We give information on facilities providing a given treatment or diagnostics and whether the services are realized on commercial basis, under the contract with the National Health Fund or in both options.

We inform about availability of non-standard services such as single rooms, availability of anesthesia for childbirth, etc.

Availability of non-standard services
We provide information about price offers of commercial facilities for particular types of procedures. We inform whether a facility’s price list includes comprehensive medical expenses or a cost of treatment alone, and separately costs of additional benefits, such as stay and tests.

Waiting times in the public system
In the case of benefits for which the system of publicly funded services forms/queue management are carried out electronically, we provide information about the availability of services in the treatment funded by the National Health Fund (NFZ).

Information on the offer of hospital facilities
We give information on facilities providing a given treatment or diagnostics and whether the services are realized in a given hospital or medical centre, in terms of provided treatment, used methods and introduced innovations and facilities.

Information on the estimated cost of treatment

I. List of Elective surgeries and related accompanying services available for the Patients over 17 years of age and below 70 years of age

The coverage includes coordination and financing of a part of the costs of an Elective surgery, up to the amount of the Discount specified in the table below. The discount is calculated from the price list of the Hospital performing an Elective surgery.

The performance of Elective surgeries includes the following components: consultation to determine eligibility for surgery, with a physician of appropriate medical specialty, anesthetic qualification, the treatment procedure, adequate anesthesia (standard and typical of the procedure), medically necessary hospital stay, directly resulting from surgical procedures performed, medical and nursing care during the hospital stay, drugs administered during the hospital stay, mesh for hernia surgeries, artificial materials for fracture fixation (wires, screws, fixation), small medical materials related to the surgery (thread, stitching), disposable components of multiple use equipment, suture removal associated with the procedure, consultation after the procedure (within 30 days of the Elective surgery).

Elective surgeries do not include: transplantation of organs or tissues, cells, cell cultures (cultivated naturally or artificially), including those involving an autograft or inserting implants and devices (unless the scope of the Elective surgery provides for inserting implants or devices as part of the procedure), subsequent consultations at the Hospital apart from the post-surgery consultation.

Stays in treatment wards (except for post-operative wards and intensive care wards) are held in single or double rooms, if it is possible given the medical reasons and premises.

Elective surgeries are performed based on a valid referral issued by a physician from an outpatient Own Facility.

II. List of Elective surgeries and related accompanying services available for the Patients below 17 years of age

The coverage includes coordination and financing of a part of the costs of an Elective surgery, up to the amount of the Discount specified in the table below. The discount is calculated from the price list of the Hospital performing an Elective surgery.

The performance of Elective surgeries includes the following components: consultation to determine eligibility for surgery, with a physician of appropriate medical specialty, anesthetic qualification, the treatment procedure, adequate anesthesia (standard and typical of the procedure), medically necessary hospital stay, directly resulting from surgical procedures performed, medical and nursing care during the hospital stay, drugs administered during the hospital stay, mesh for hernia surgeries, artificial materials for fracture fixation (wires, screws, fixation), small medical materials related to the surgery (thread, stitching), disposable components of multiple use equipment, suture removal associated with the procedure, consultation after the procedure (within 30 days of the Elective surgery).

Elective surgeries do not include: transplantation of organs or tissues, cells, cell cultures (cultivated naturally or artificially), including those involving an autograft or inserting implants and devices (unless the scope of the Elective surgery provides for inserting implants or devices as part of the procedure), subsequent consultations at the Hospital apart from the post-surgery consultation. Stays in treatment wards (except for post-operative wards and intensive care wards) are held in single or double rooms, if it is possible given the medical reasons and premises.

Elective surgeries are performed based on a valid referral issued by a physician from an outpatient Own Facility.

</table>
VIP Patient’s Personal Assistant

Each Patient is assigned a VIP Patient’s Personal Assistant. The Assistant contacts the Patient regularly by phone, arranges examinations and medical consultations in selected outpatient Own Facilities.

10% discount on other services offered by LUX MED and Medycyna Rodzinna

The Patient is entitled to a 10% discount on medical services, excluding dental services, offered by LUX MED Own Facilities – this applies to LUX MED and Medycyna Rodzinna facilities listed on www.luxmed.pl. The discount is calculated from the price list available in the facility. Discounts may not be combined.

10% discount on medical procedures provided in PROFEMED

The Patient is entitled to a 10% discount on all medical procedures provided in PROFEMED facilities. Information about the rendered services is available on www.profemed.pl. The discount is calculated from the price list available in the facility. Discounts may not be combined.

10% discount on medical procedures provided in the LUX MED Hospital

The Patient is entitled to a 10% discount on all medical procedures provided in the LUX MED Hospital. The discount is calculated from the price list available in the facility. Discounts may not be combined.

10% discount on medical procedures provided in the Carolina Medical Center Hospital

The Patient is entitled to a 10% discount on all medical procedures offered by Sport Medica SA at Carolina Medical Center (detailed information about the facility is available on www.carolina.pl). The discount is calculated from the price list available in the facility. The discount does not include prices of such medical materials as light cast, implants, orthotics, stabilizers, orthopaedic fixation, sutures of meniscus, and prices of drugs for intra-articular and intravenous injections. Discounts may not be combined.
