## Information for Patients

### How to prepare?

- One week prior to the examination date, do not take products containing acetylsalicylic acid, ibuprofen, naproxen or other pain relievers, unless otherwise directed by your doctor.
- If you are taking anticoagulants (blood-thinning medications), inform the doctor who ordered the examination. The doctor will advise you when and how to stop these medications before the procedure.
- If you have any doubts about whether your current medications may affect the examination, consult the referring physician.

### What to bring?

Image documentation of an ultrasound scan with a description and a referral in paper or electronic version should be brought for the examination.
