Number of facilities: 107

* The area is a part of the "Diagnostics and treatment within a medical treatment ward" service, and the exemptions from the Insurer's liability related to this area apply to it.

** The area is a part of the "General surgery" service, and the exemptions from the Insurer's liability related to this area apply to it.

The scope of services presented in the table above for a given hospital may cover only a part of the health services arising from the scope of the Insurance Agreement specified in LUX MED General Terms and Conditions of the LUX MED Hospital Insurance – Full Care, and it depends on the scope of health services provided by a given facility. Therefore, the provision of a specific health service may require the provision of a specific health service at the Hospital specified by the Insurer, other than it would result from the lists, and the selection of a hospital relevant for a given type of insurance event is performed at the stage of the organisation of the service together with the Hospital Care Coordinator.
